JAVASCRIPT É PARA
QUEM TEM O DOM.

```

    }) .done(function(response) {
        for (var i = 0; i < response.length; i++) {
            var layer = L.marker(
                [response[i].latitude, response[i].longitude]
                // ,{icon: myIcon}
            );
            layer.addTo(group);

            layer.bindPopup(
                "<p>" + "Species: " + response[i].species + "<br>"
                "<p>" + "Description: " + response[i].description + "<br>"
                "<p>" + "Seen at: " + response[i].latitude + " " + response[i].longitude
            );
        }
    });
}

```

Vamos começar?

```

        method: "GET"
    }) .done(function(response) {
        for (var i = 0; i < response.length; i++) {
            var layer = L.marker(
                [response[i].latitude, response[i].longitude]
                // ,{icon: myIcon}
            );
            layer.addTo(group);
        }
    });
}

```
