Logar na Console

Console de navegação e controle de custos

The screenshot displays the Microsoft Azure Cost Management console. The top navigation bar includes the Microsoft Azure logo, a search bar, and various utility icons. The breadcrumb trail indicates the path: Home > Cost Management + Billing | Cost Management > Cost Management: Pay-As-You-Go. The main header shows 'Cost Management: Pay-As-You-Go | Cost analysis' with a close button. A left-hand navigation pane lists various sections: Overview, Access control, Diagnose and solve problems, Cost Management (highlighted), Cost analysis (selected), Cost alerts, Budgets, Advisor recommendations, Billing (Invoices, Payment methods), and Products + services (Azure subscriptions, Reservations + Hybrid Benefit). The main content area shows the 'Scope: Pay-As-You-Go (change)' and a search bar. Below this, there are buttons for 'Back', 'Customize', 'Download', and 'Filter rows'. A date selector shows 'Mar 2024'. The summary section displays 'Total (BRL) R\$7.12', 'Average R\$0.00 / day', and 'Budget: None (create)'. A message box indicates 'Showing 2 of 2 resource groups' and 'Check back tomorrow for cost anomaly insights See insights'. A table lists the resource groups and their costs:

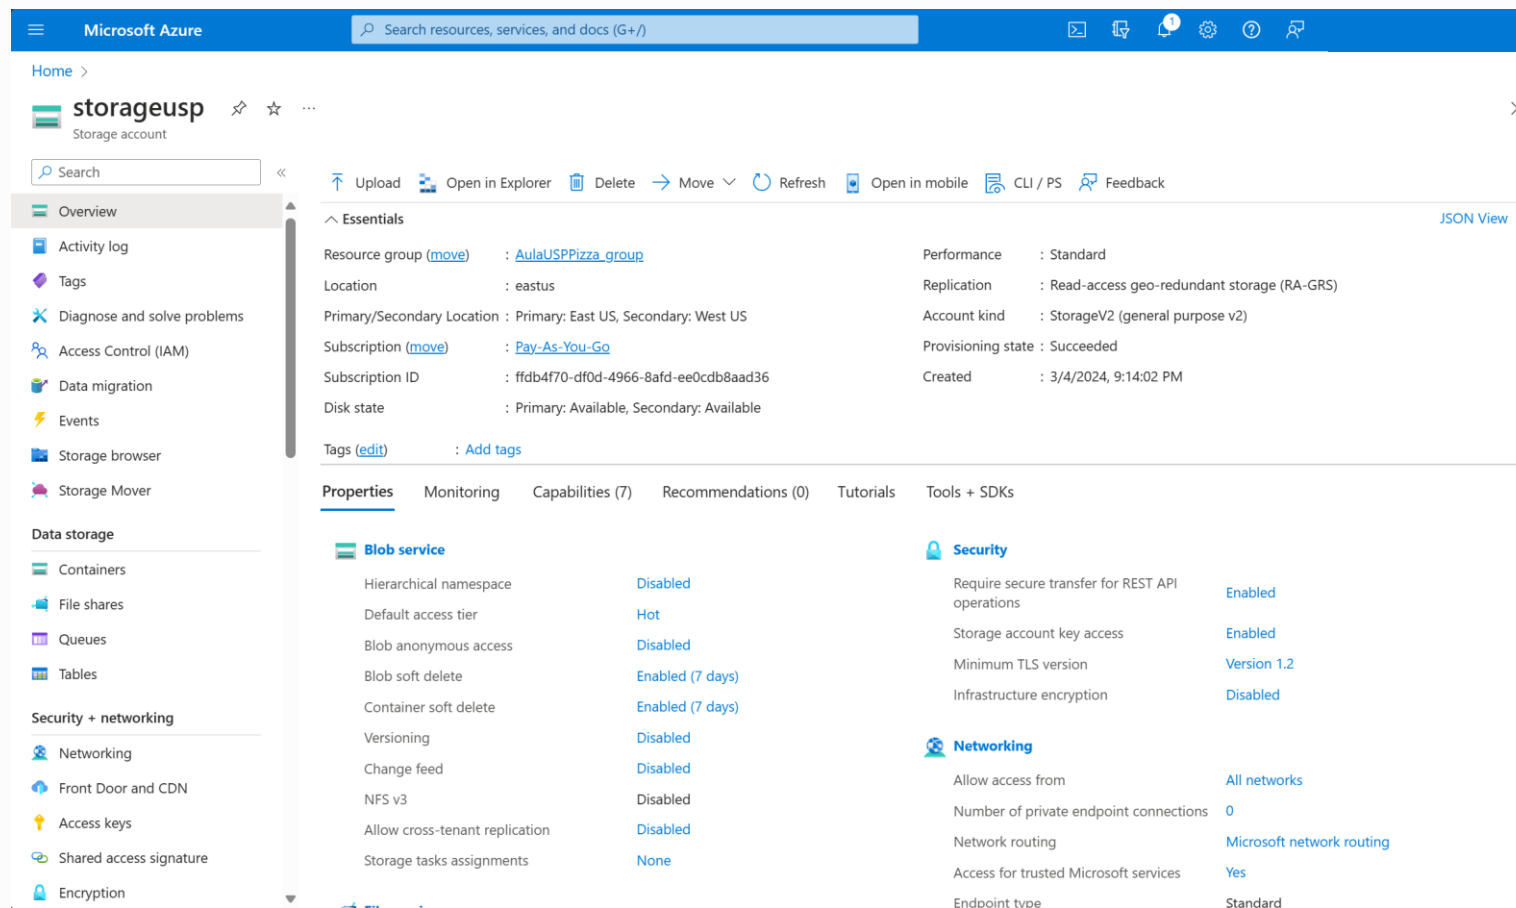

Name	Subscription	Total ↓
> rgaulausp	Pay-As-You-Go	R\$7.09
> cloud-shell-storage-westus	Pay-As-You-Go	R\$0.04

At the bottom, there is a pagination bar showing 'Page 1 of 1' with 'Previous' and 'Next' buttons.

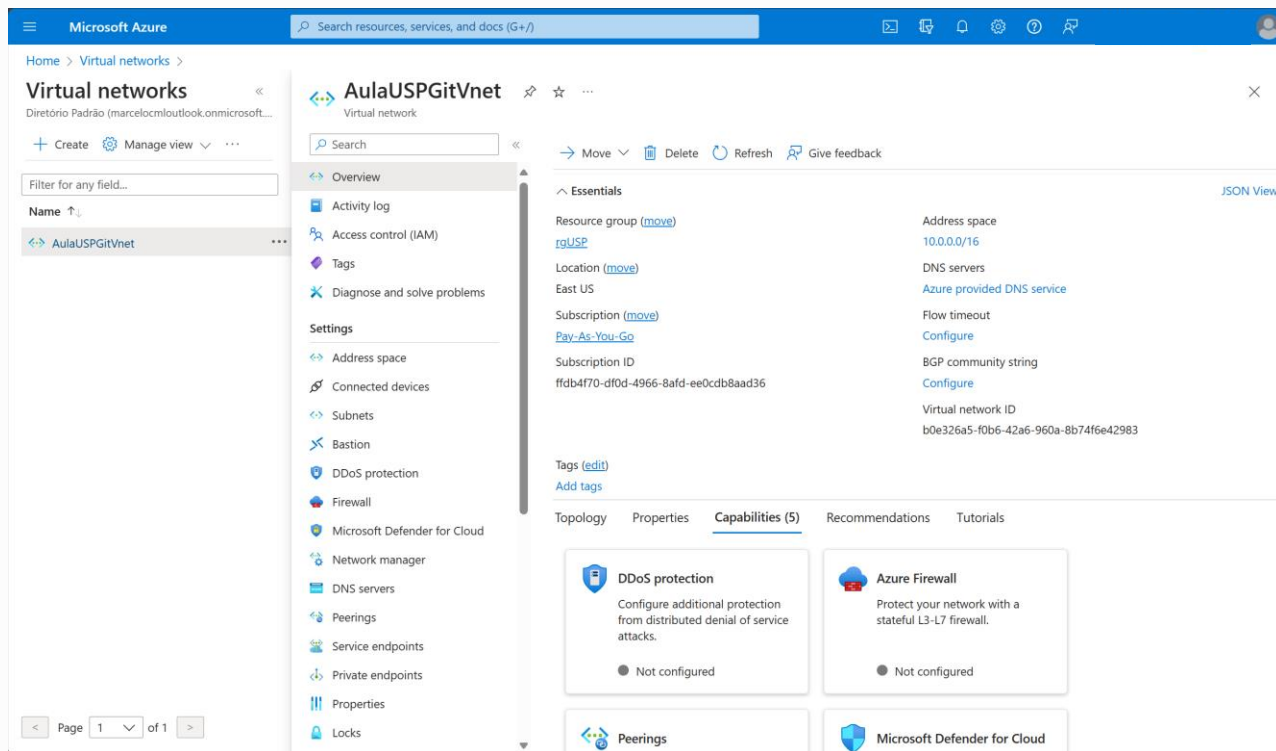

- Configurações de língua e país
- Serviços de busca de serviços
- Notificações e suporte
- Marketplace de soluções
- Azure Cost Management para controle de orçamento e monitoramento de custos

Armazenamento em Nuvem

- Object Stores estão contidas dentro do serviço “Storage Accounts” no Azure
- Existem vários tipos de armazenamento dentro deste serviço
- Hot, Cold e Archive são tipos comuns entre os provedores de nuvem

Redes em Nuvem

- vNets e Subnets completas com diversas possibilidades de configurações e topologias
- vNet peering para conexões entre ambientes
- Serviços de segurança opcionais
- Public and Private IPs

Primeira aplicação na Nuvem!

Hello World Application – Pré requisitos

Conta do Azure.com

Conta do GitHub.com

Hello World Application

1) Faça o Fork da solução

<https://github.com/marcelocml/vanilla-basic>

2) Crie um “Static Web App” na console do Azure:

The screenshot shows the 'Create Static Web App' page in the Microsoft Azure portal. The page is divided into several sections: 'Basics', 'Tags', and 'Review + create'. The 'Basics' tab is active. The page includes a search bar at the top, a breadcrumb trail 'Home > Static Web Apps >', and a title 'Create Static Web App'. Below the title, there is a description of App Service Static Web Apps. The 'Project Details' section contains two dropdown menus: 'Subscription' (set to 'Pay-As-You-Go') and 'Resource Group' (set to '(New) AulaUSP_group'). Below these is a 'Create new' link. The 'Static Web App details' section has a 'Name' field set to 'AulaUSP' with a green checkmark. The 'Hosting plan' section has a 'Plan type' section with two radio buttons: 'Free: For hobby or personal projects' (selected) and 'Standard: For general purpose production apps'. The 'Azure Functions and staging details' section has a 'Region for Azure Functions API and staging environments' dropdown set to 'Central US'. At the bottom, there are three buttons: 'Review + create' (blue), '< Previous' (grey), and 'Next : Tags >' (white).

Hello World Application

- 1) Conecte na sua conta GitHub
- 2) Autorize o acesso aos seus repositórios
- 3) Selecione a “Organization”, “Repository” e “Branch” para conexão com a solução que foi copiada do repositório GitHub
- 4) Clique em “Review + create”

The image shows two side-by-side screenshots from the Azure portal. The left screenshot is the 'Authorize Azure Static Web Apps' dialog. It features the GitHub logo and a green checkmark. Below the title, it says 'Authorize Azure Static Web Apps by Azure App Service Static Web Apps wants to access your marcelocml account'. There are three expandable sections: 'Repositories' (Public and private), 'Workflow' (Update GitHub Action Workflow files), and 'Organization access' (PacktPublishing). At the bottom, there are 'Cancel' and 'Authorize Azure-App-Service-Static-Web-Apps' buttons. A note at the bottom says 'Authorizing will redirect to https://functions.azure.com'. The right screenshot is the 'Create Static Web App' configuration page. It has a 'Deployment details' section with 'Source' set to 'GitHub' and 'GitHub account' set to 'marcelocml'. Below this is a blue information box. The 'Build Details' section has dropdowns for 'Organization' (marcelocml), 'Repository' (static-website-example), and 'Branch' (master). There is also a 'Build Presets' dropdown. At the bottom, there are 'Review + create', '< Previous', and 'Next : Tags >' buttons.

Authorize Azure Static Web Apps

Azure Static Web Apps by Azure App Service Static Web Apps wants to access your marcelocml account
