THE JOURNEY IS NOT LINEAR

NEW PARADIGMS OF THE OMNI WORLD

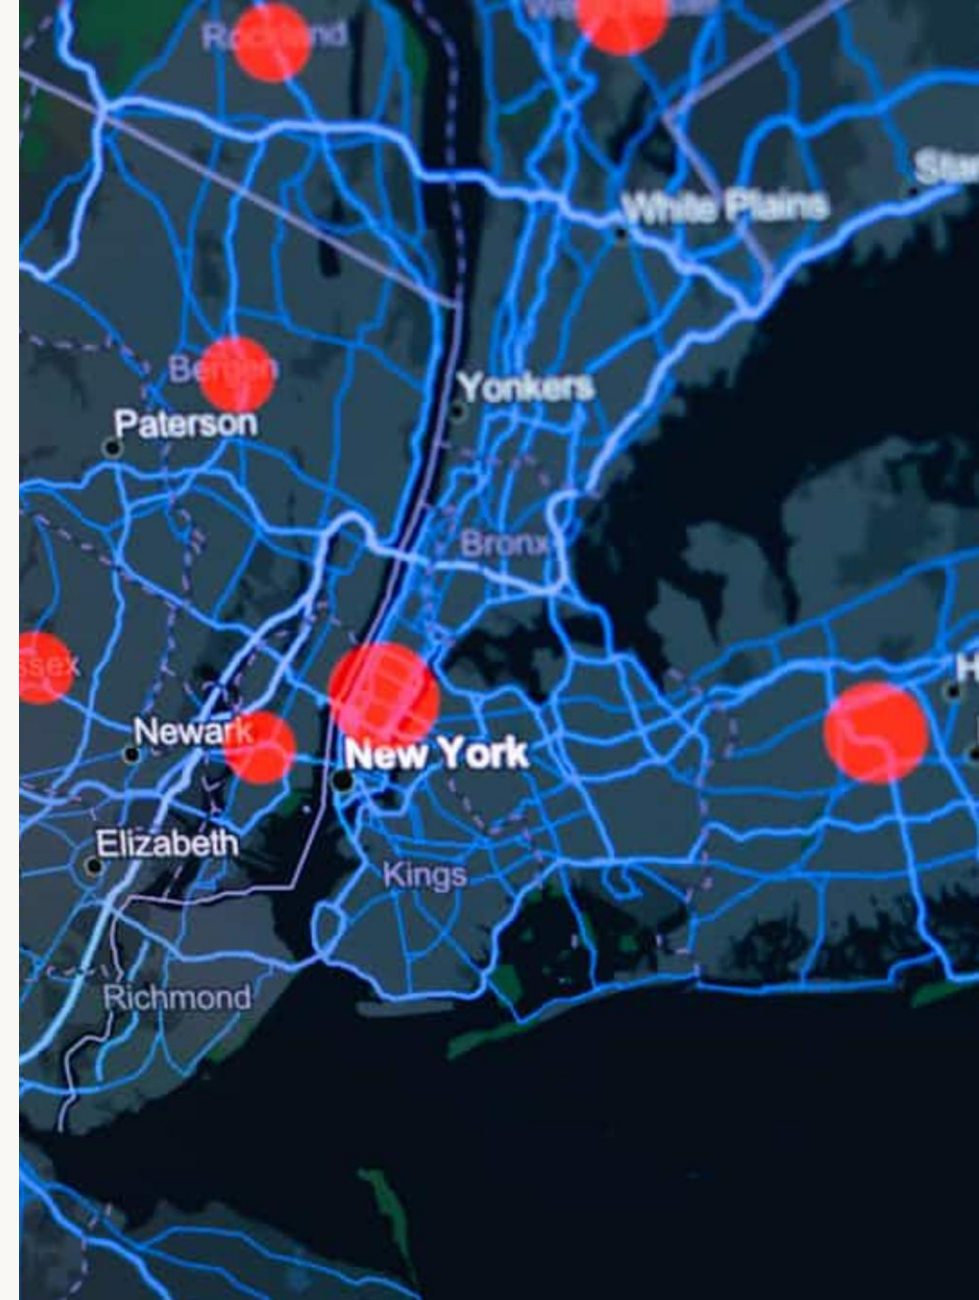

BEHAVIOR	HOW IT WAS	HOW IT NEEDS TO BE
ACCESS TO INFORMATION	Restricted	Unrestricted, customized
COMPETITION	Defined, local	Global
TRACEABILITY	Little trace	Digital trace
CONSUMPTION CHANNELS	Few, preset	Multiple, mixed together
CONSUMER VOICE	Confined, restricted	Digital, echoes
CONSUMPTION MODEL	Having	Enjoying
AVAILABILITY	Preset	At any moment

What is Unified Experience in Retail

Unified Experience is an advanced strategy that offers customers a **continuous, personalized, and consistent journey** at all brand touchpoints — physical store, e-commerce, app, social media, marketplace, call center, and after-sales service.

Unlike just “being on too many channels,” the unified experience integrates people, processes, data, and technology to eliminate friction and give customers control, convenience, and trust.

- ❏ In practical terms, customers log in once, see the same prices, find the same inventory, use the same loyalty program, and can start something in one channel and finish it in another without friction.

What is Unified Experience?

Perfect Integration

Harmonious fusion between physical and digital channels to create a unique journey for the consumer

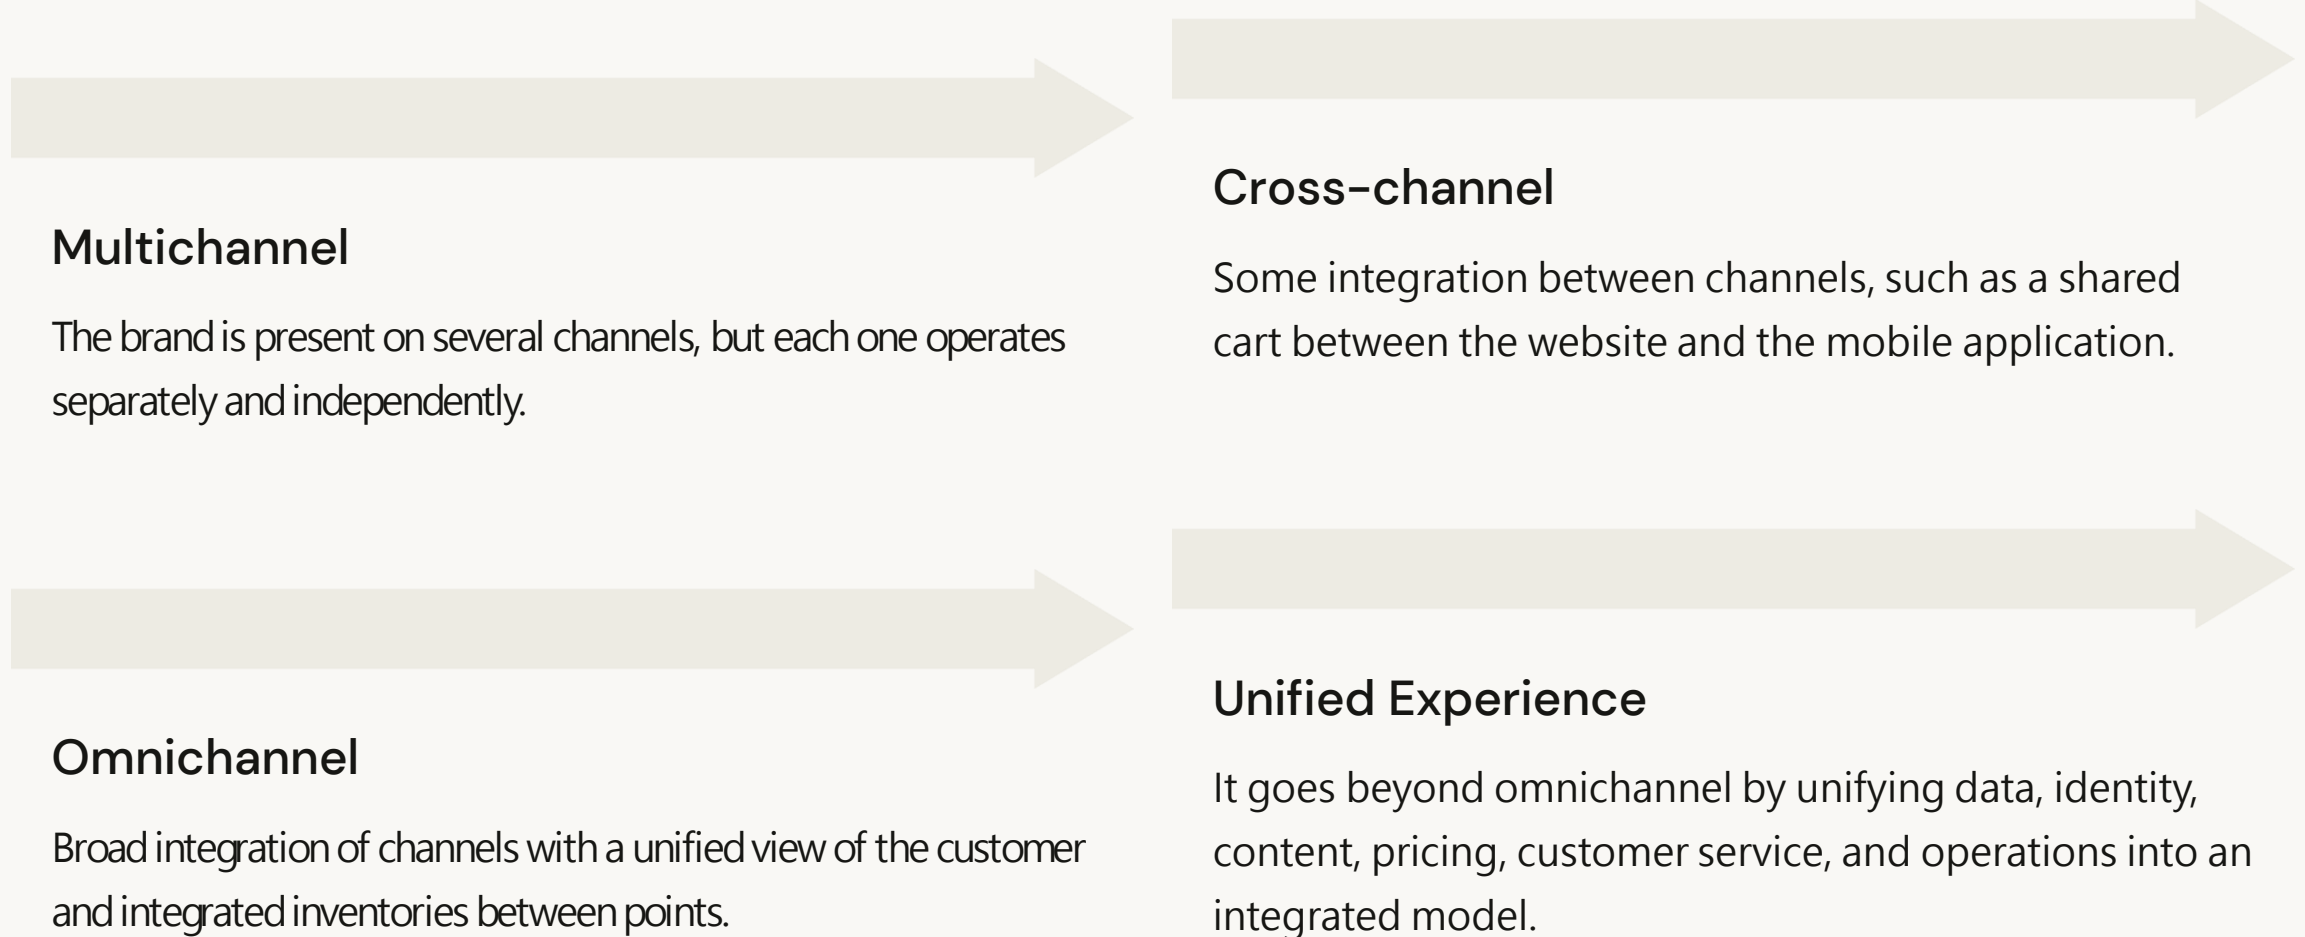

Immersive Design

Stores that combine personalized personalized service, sensory environments, and interactive technology

Strategic Loyalty

Main objective: to create lasting emotional bonds and stand out in competitive markets

Evolution of Retail Models

Multichannel

The brand is present on several channels, but each one operates separately and independently.

Cross-channel

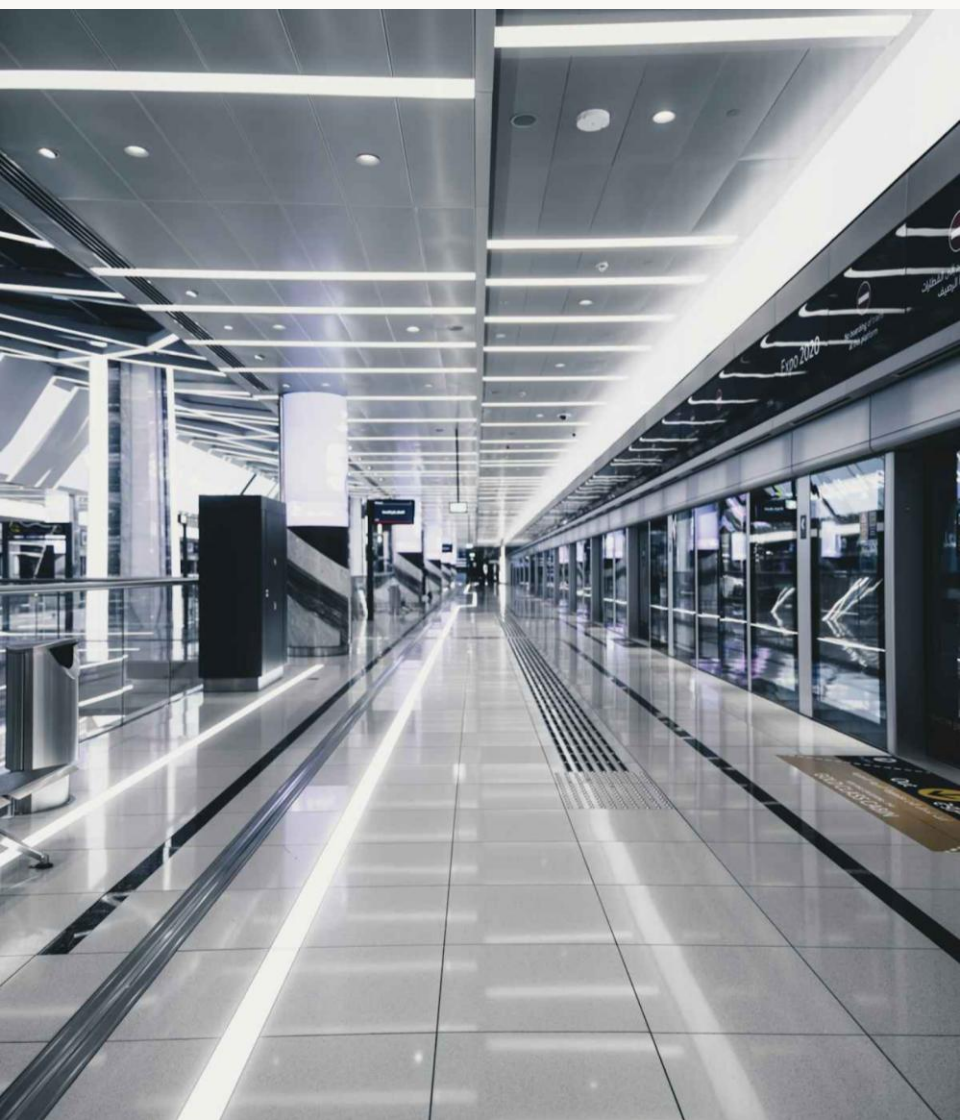

Some integration between channels, such as a shared cart between the website and the mobile application.

Omnichannel

Broad integration of channels with a unified view of the customer and integrated inventories between points.

Unified Experience

It goes beyond omnichannel by unifying data, identity, content, pricing, customer service, and operations into an integrated model.

The 9 Pillars of the Unified Experience

Unique Identity

Consistent login and profile on all channels with complete identity resolution.

Centralized Data

CDP to unify transactional, behavioral, and service data.

Unified Inventory

OMS with real-time vision and intelligent fulfillment rules.

Consistent Catalog

PIM to standardize products and unified promotions engine.

Integrated Loyalty

Points, coupons, and benefits working across any channel.

Unified Service

Unique history of omnichannel interactions and returns.

Design System

Consistent visuals, tone of voice, and messaging through headless CMS.

Digital Store

Integrated BOPIS, BORIS, endless aisle, and clienteling.

Real-Time orchestration

Quick reactions to events such as cart abandonment and disruptions.

Reference Architecture

01

Experience Layer

Website, app, POS, kiosks, social commerce, marketplaces, and integrated contact center.

02

Journey Orchestration

Decision tool that uses CDP data to personalize experiences in real time.

03

Customer Data

Centralized and integrated CDP, CRM, Data Lake, and consent management.

04

Trade and Content

Headless e-commerce, PIM, CMS, and unified promotion and pricing engines.

05

Integrated Operations

OMS, WMS, ERP, and carrier integration for optimized fulfillment.

MACH (Microservices, API-first, Cloud-native, Headless) and event-driven architectures ensure scalability.

Capabilities of the Integrated Physical Store

BOPIS and ROPIS

Online purchase with quick and efficient in-store pickup, reducing delivery costs.

BORIS

Return in online shopping stores with instant refund and simplified experience.

Curbside

In-car pickup with app check-in, offering maximum convenience to customers.

Endless Aisle

Seller finds and sells items out of local inventory through integration with other channels.

Clienteling

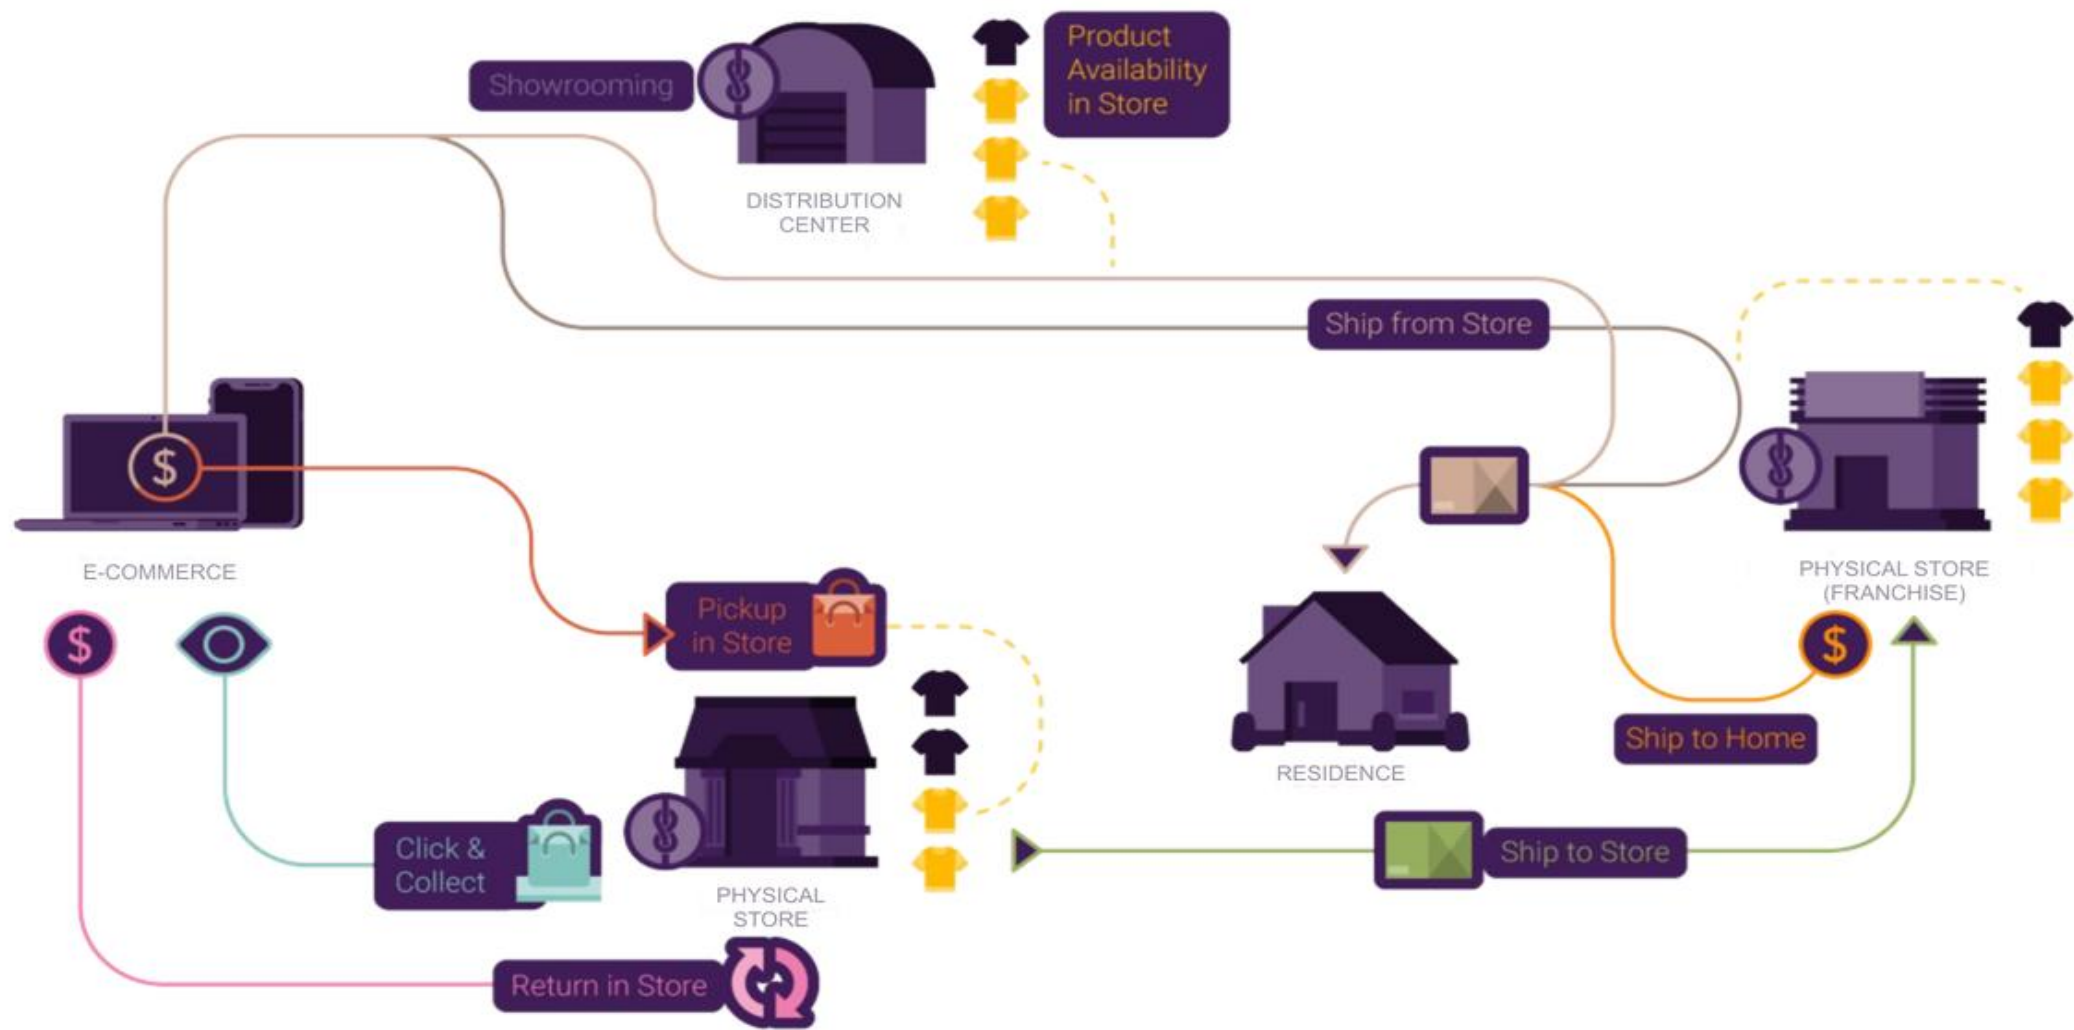

Complete history and preferences in the hands of the seller for personalized recommendations.

Schedulings

Fitting rooms and consultants integrated into the store's calendar for a premium experience.

OMNI MACROPROCESSES

Inspiring Examples of Unified Experience

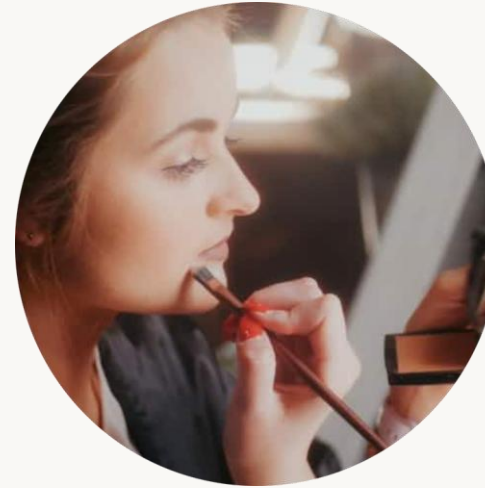

Apple

Perfect continuity between app, website, and physical store, with Genius Bar scheduling and fluid payments on any channel.

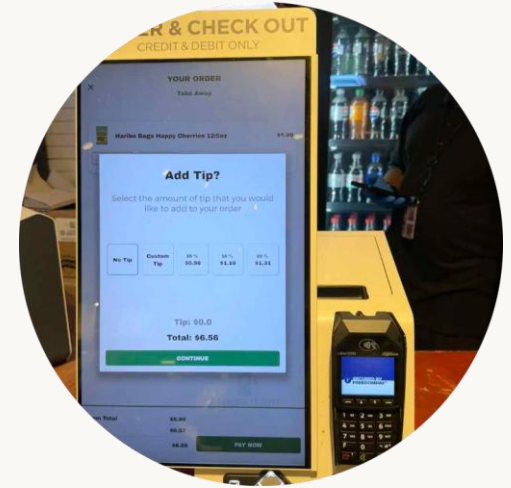

Nike

An app integrated with physical stores, reservation system, points program, and gamified challenges that engage customers.

Sephora

Unified purchase history, personalized beauty profiles, and consistent AI-based recommendations.

Starbucks

Digital wallet and benefit program working perfectly at any store, drive-thru, or delivery.

Important note: Execution varies by market and legislation, but the fundamental principles are universally replicable for success in modern retail.

How was the NRF Paris ?

centraldovarejo.com.br

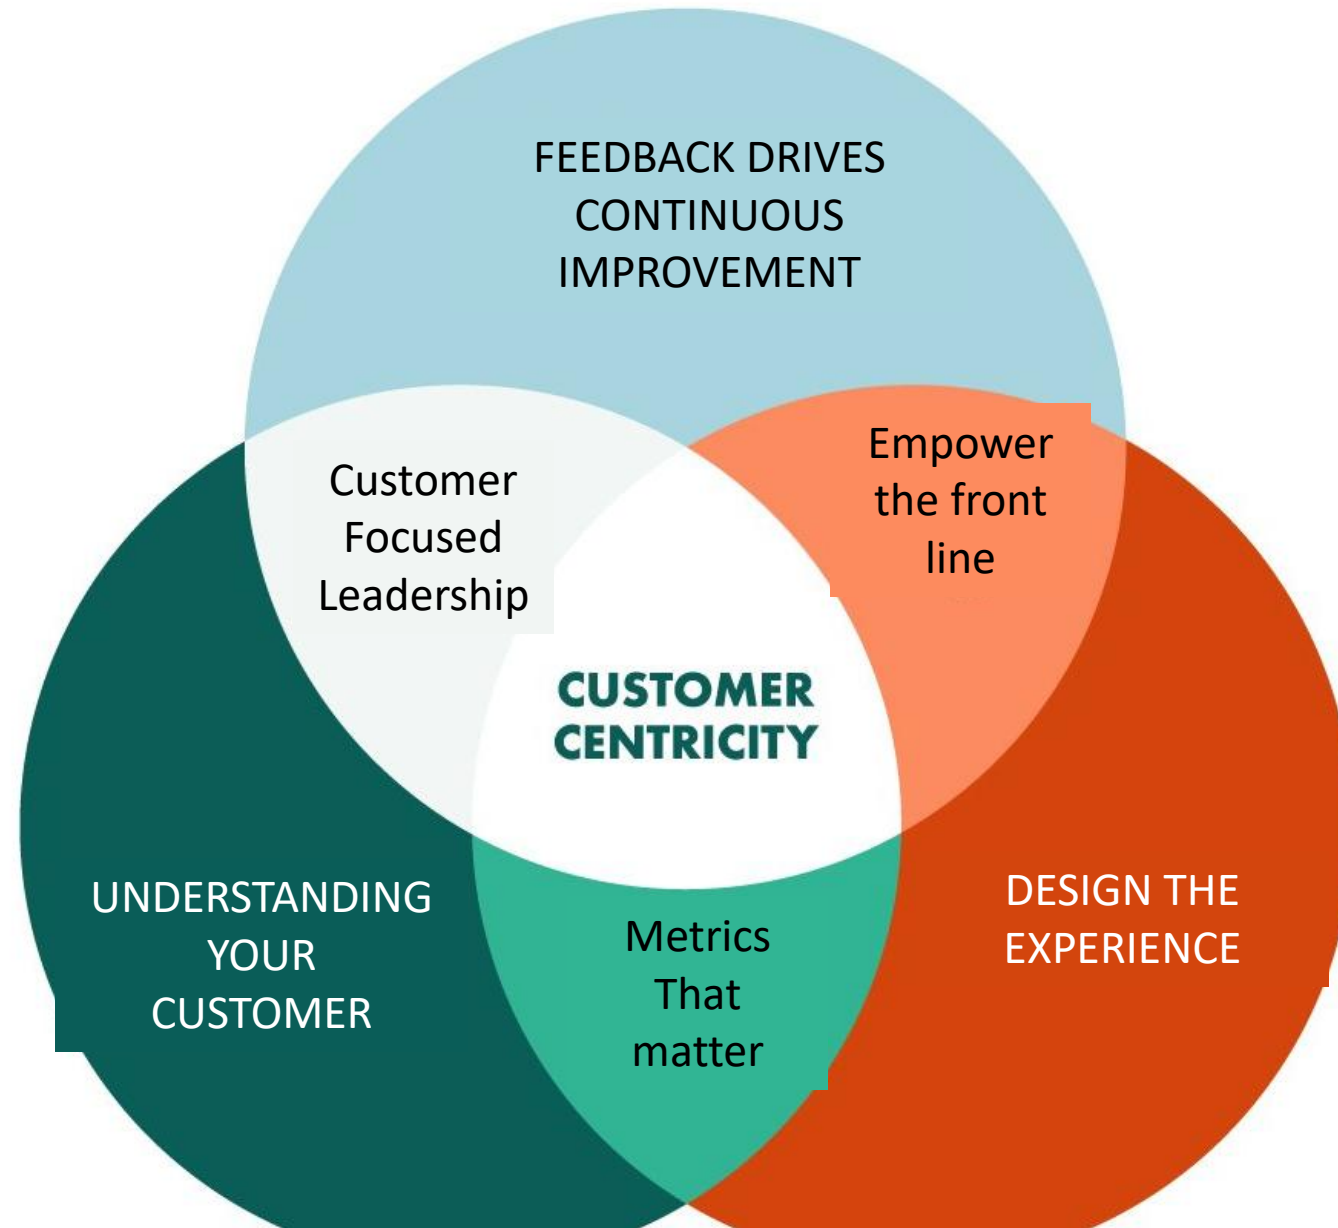

central do VAREJO

What are the main messages from the 3 days of content ?

1

CUSTOMER IN THE CENTER

The new customer reality

TURNING POINTS

1. Shopping Experience store and online as experiences, not just transactions.
2. Usage Experience support throughout the journey: explanation, financing, delivery, installation, maintenance and disposal.
3. Impact Experience sustainability, conscious consumption (e.g.: 7,000 products seal). Better Way
4. Employee Experience appreciation of people and human service.

Our “lessons learned” for a Store Transformation

Anchor the approach in **customer needs**

Activate **change management** from the beginning

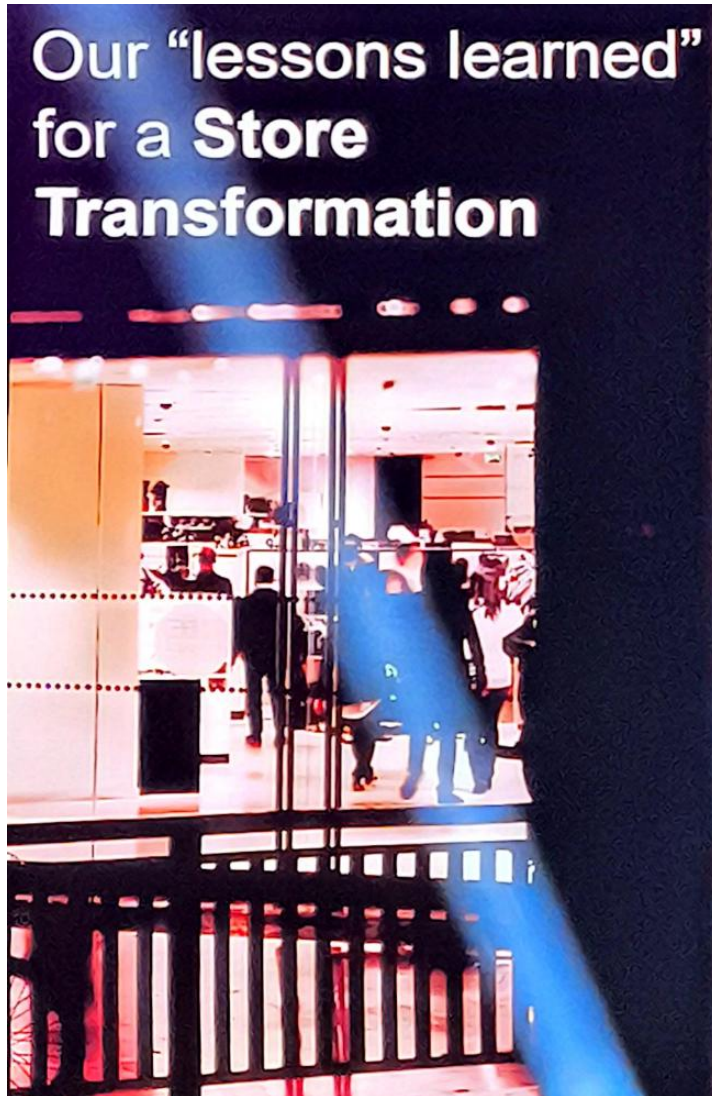

Solve the **talent puzzle**

Think **platform first**, then technologies

Run the transformation with an **omni-channel angle**

Anchor the approach in **customer needs**

Activate **change management** from the beginning

Solve the **talent puzzle**

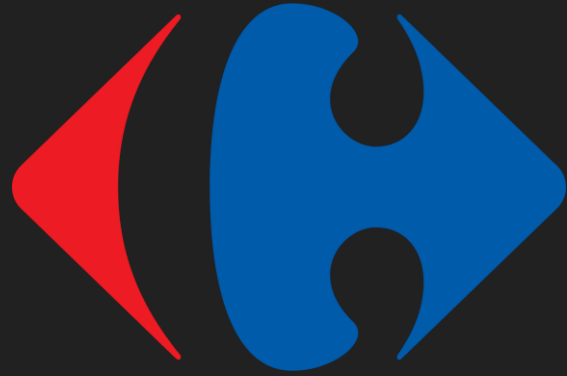

Think **platform first**, then technologies

Run the transformation with an **omni-channel angle**

2

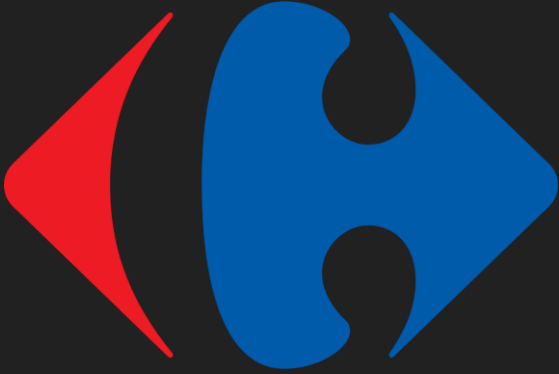

ARTIFICIAL INTELLIGENCE

Carrefour - AI

- It developed an AI solution in less than a year that recovered 1% of revenue through loss reduction

Applied AI

- Geolocation and Bluetooth connectivity: enables tracking of products and customers within the store, plus greater personalization.
- Computer Vision: real-time monitoring of shelves
- Digital tags and IoT data: real-time pricing dynamics and integration with e-commerce processes, such as click & collect.
- AI applied to the entire journey: Customer service, inventory management, logistics planning, offer personalization, and implementation of Google Gemini for 300,000 Carrefour employees, training teams globally.

Super-Pharm

- autonomous robots for delivering packages at the pickup point
- augmented reality on store shelves
- AI systems to personalize ambient music in stores

Creating a market street of tomorrow

Price cuts on the products that mean most

Investment in technology and artificial intelligence

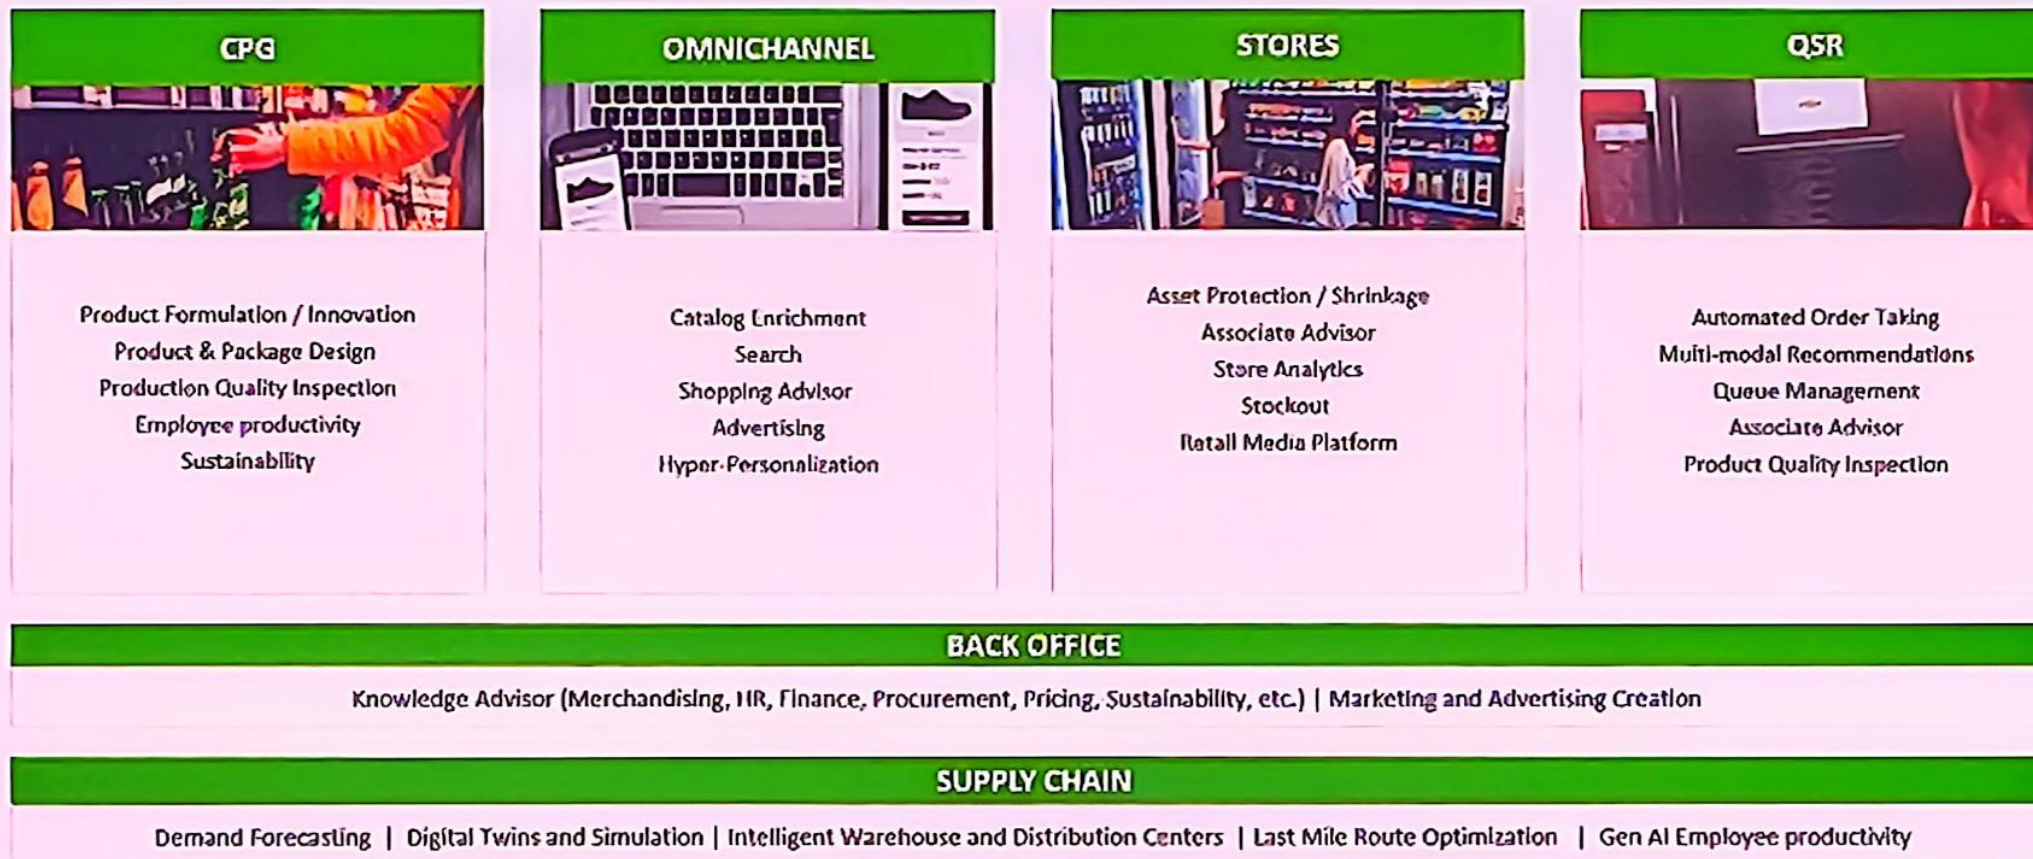

Promotions right for all customer personas

Over 400 new & developed products for our customers

UNIFIED COMMERCE

KIKO
MILANO

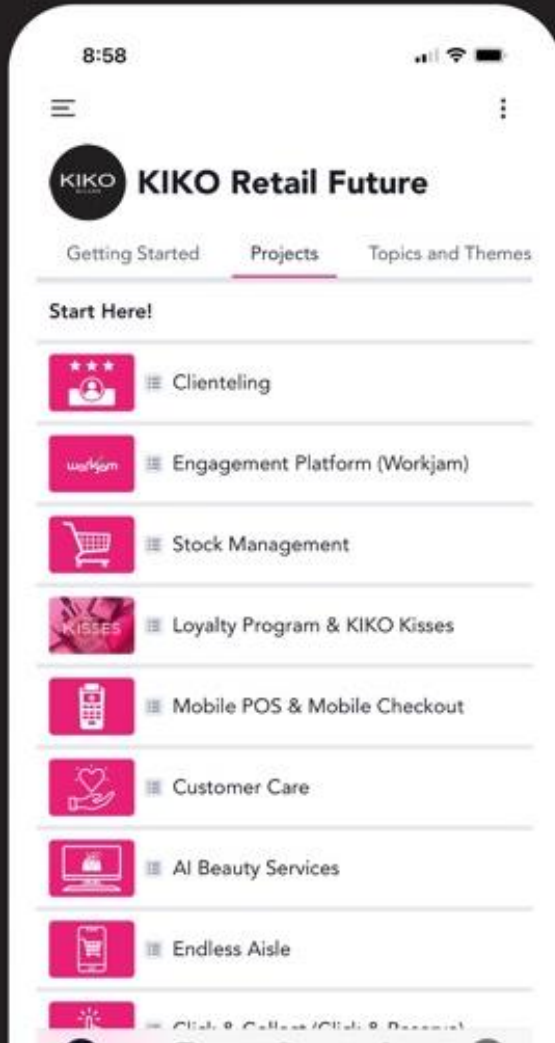

Ecommerce app

KIKO - Unified Commerce

“Unified Commerce is not solely a technological or commercial project. It is a company project. It only works when all areas operate together in a unified ecosystem, creating a seamless experience for both customers and employees”
Simone Dominici, CEO of KIKO Milano

Restez informé, restez connecté
à KIKO Retail Future.

How Kiko was able to build a unified system

Customer data, purchase history, and preferences;

Physical and digital inventories on a single platform;

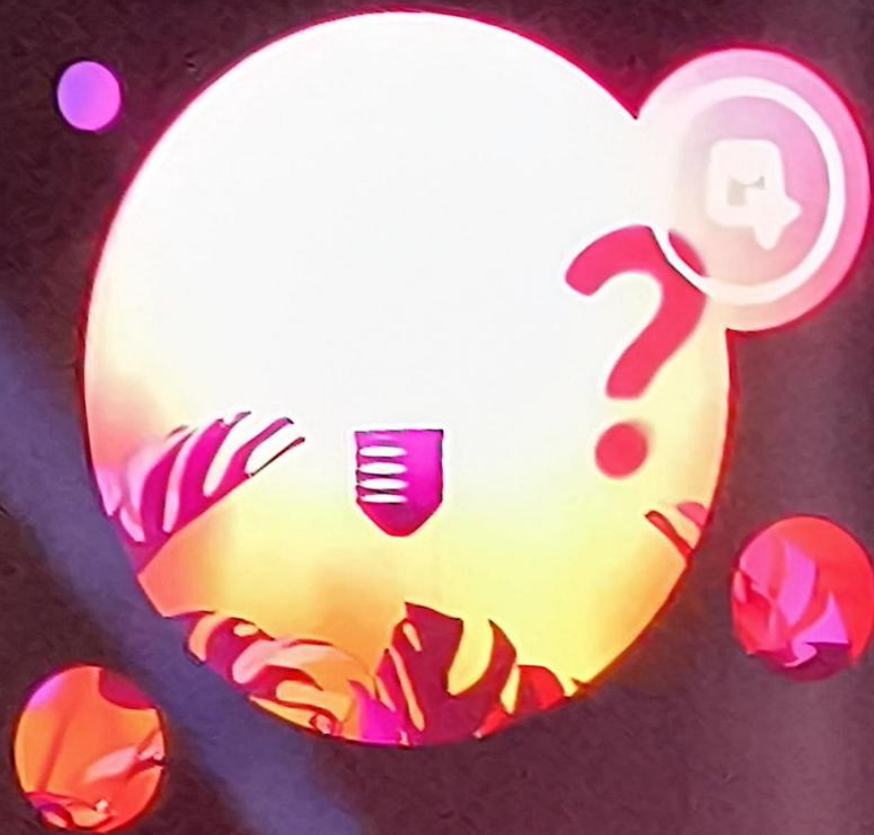

Personalized experiences in stores and online.

Benefits:

Frictionless checkout
Integrated inventory
Team empowerment
Data-based decisions

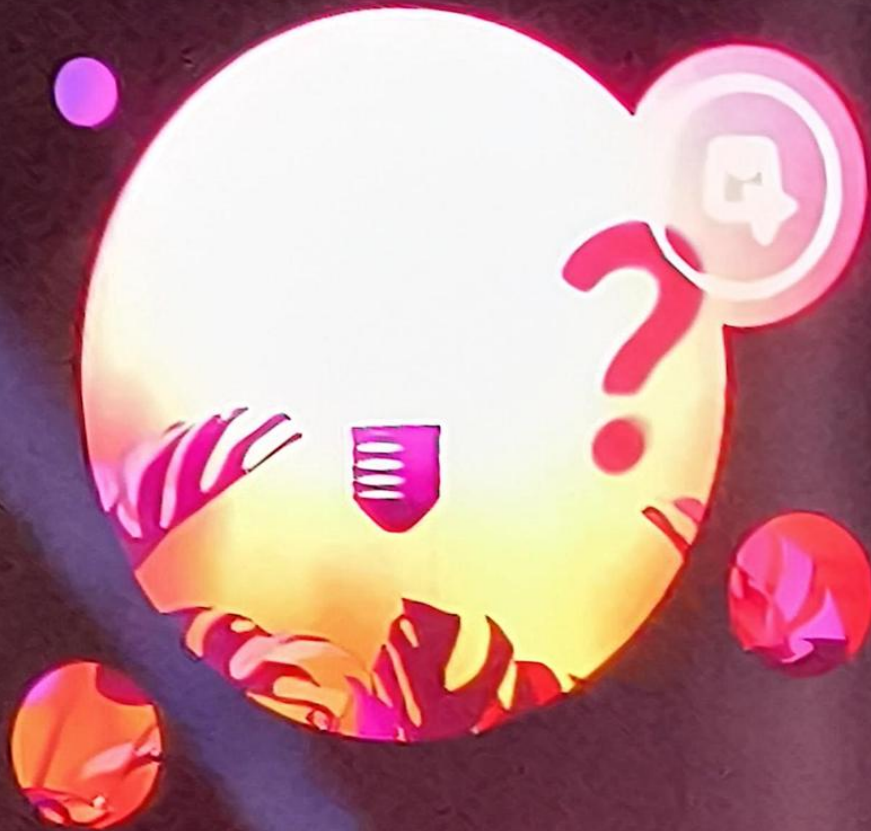

WHAT is Unified Commerce?

Unified Commerce is a tagline for Retailing in a modernized way, leveraging Data, new Technologies and Business Models to better serve and reach customers in a personalized engaging way, as a Brand...

...and along the way reducing inefficiencies, cost, and empowering frontline workers to focus on the Customer and value add activities

WHAT is Unified Commerce?

Unified Commerce is a concept for Retail in a modernized way, leveraging data, new technologies, and business models to better serve and reach customers in a personalized and engaging way, as a Brand...

...while reducing inefficiencies and costs, and empowering front-line employees to focus on the customer and value-added activities.

Why is Unified Commerce?

KIKO
MILANO

INCREASE REVENUE

Boost footfall, increase
average basket value
and optimize conversion
rates across in-store and
online channels,
Penetration

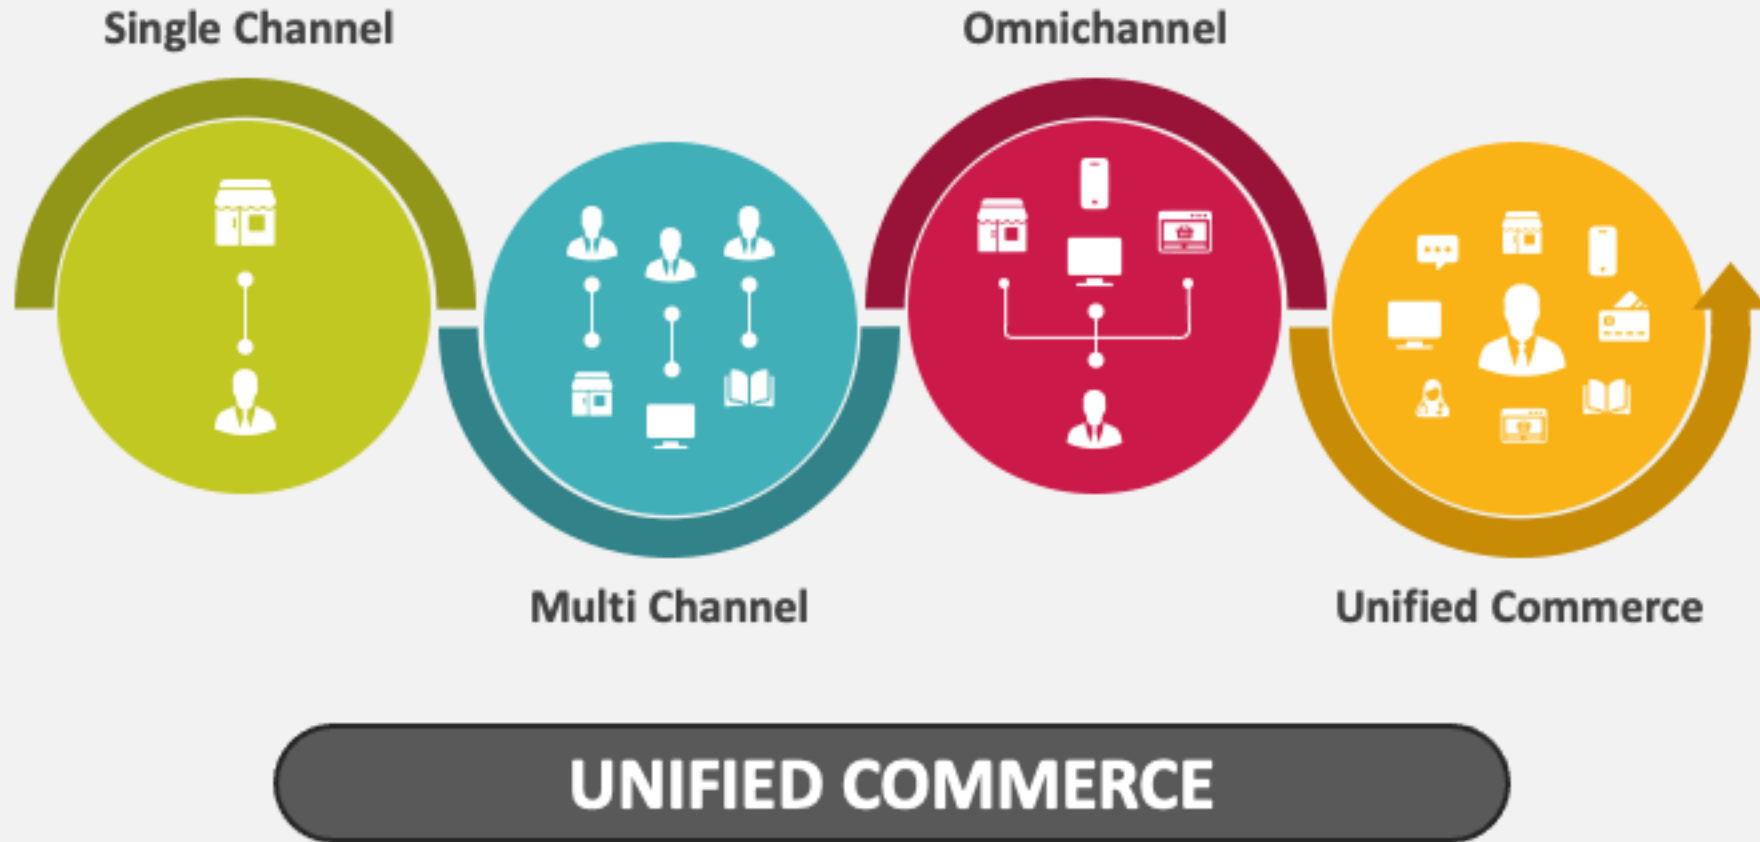

OPTIMIZE DAILY OPERATIONS

ENSURE CUSTOMER WOW

Early promise, many fulfillment
services, frictionless checkout
and payment, omnichannel
return, enhance brand equity

UNIFIED COMMERCE

What does Unified Commerce mean?

Unified commerce is the practice of connecting your back-end systems with customer-facing channels through a single platform. It is the structure that companies need to offer omnichannel journeys and create a unified view of customer interactions, products, and management systems.

4

THE BUYING EXPERIENCE

The buying experience

Fun

- Vibrant and colorful experiences in stores.
- Playful interactions that spark excitement and engagement.

Convenience

- Best value for money, without necessarily being the cheapest product.
- Simplified processes to make the buying journey smoother.

Innovation

- 450 new products launched per year, 40 of which are new to the market.
- Innovation in both products and experiences.

DALBEN STYLE LOUNGE

- Exclusive space in Dalben flagship store in partnership with L'OR Coffee.
- For 'Dalben Style' loyalty program members
- First grocery retailer in Brazil to create this experience
- One free coffee per day + space to relax, charge phones, meet people, take a break from shopping.

HOW IT WORKS:

- Tablet to sign up or update loyalty profile
- One free coffee per day
- "Exchange" coffee for data
- Use data to create personalized coffee campaigns (coffee tasting *versus* shopping history).

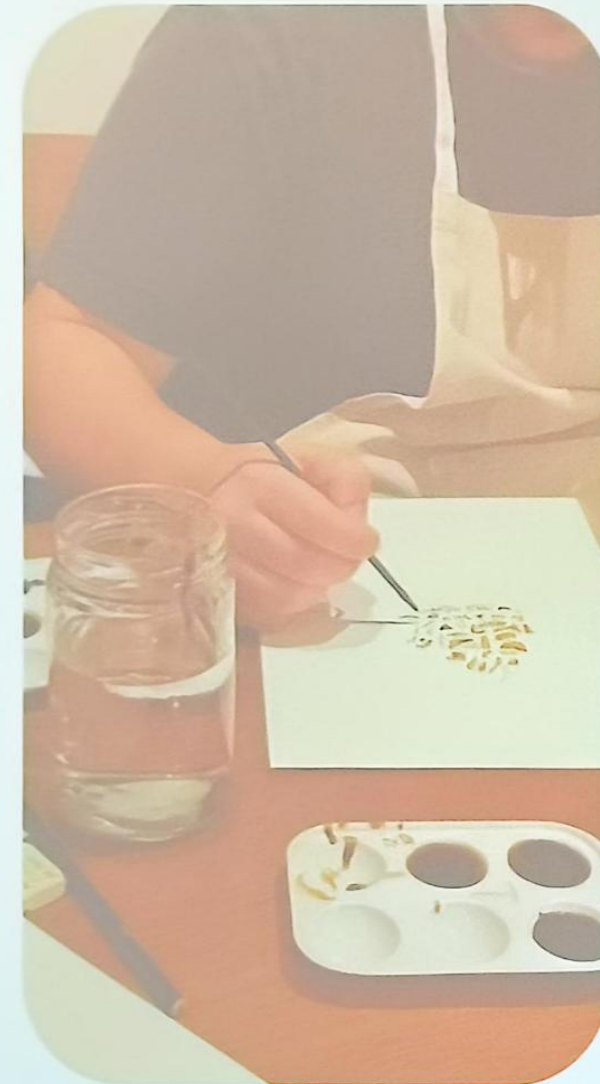

DALBEN EXPERIENCES PROGRAM

DALBEN LABS EXPERIENCE SPACE

- Inside Dalben flagship store
- Part of 'Dalben Experiences Program' - workshops, cooking classes, guided tastings.

CASE: PARTNERSHIP THREE HEARTS COFFEE

- Guided coffee tasting + workshop
- Painting with coffee grounds
- Customers created their own artwork: Took home a "piece of Dalben".
- Using digital data to connect and "disconnect" people.
- Emotional Connection: Point of sales into a community meeting point.

5 COMMUNITY

Snipes and PSG - Community

“Today's consumers want to be part of something greater. It is not enough to offer discounts; you need to create authentic connections and experiences that make sense in people's lives”

Dennis Schröder, CEO of Snipes

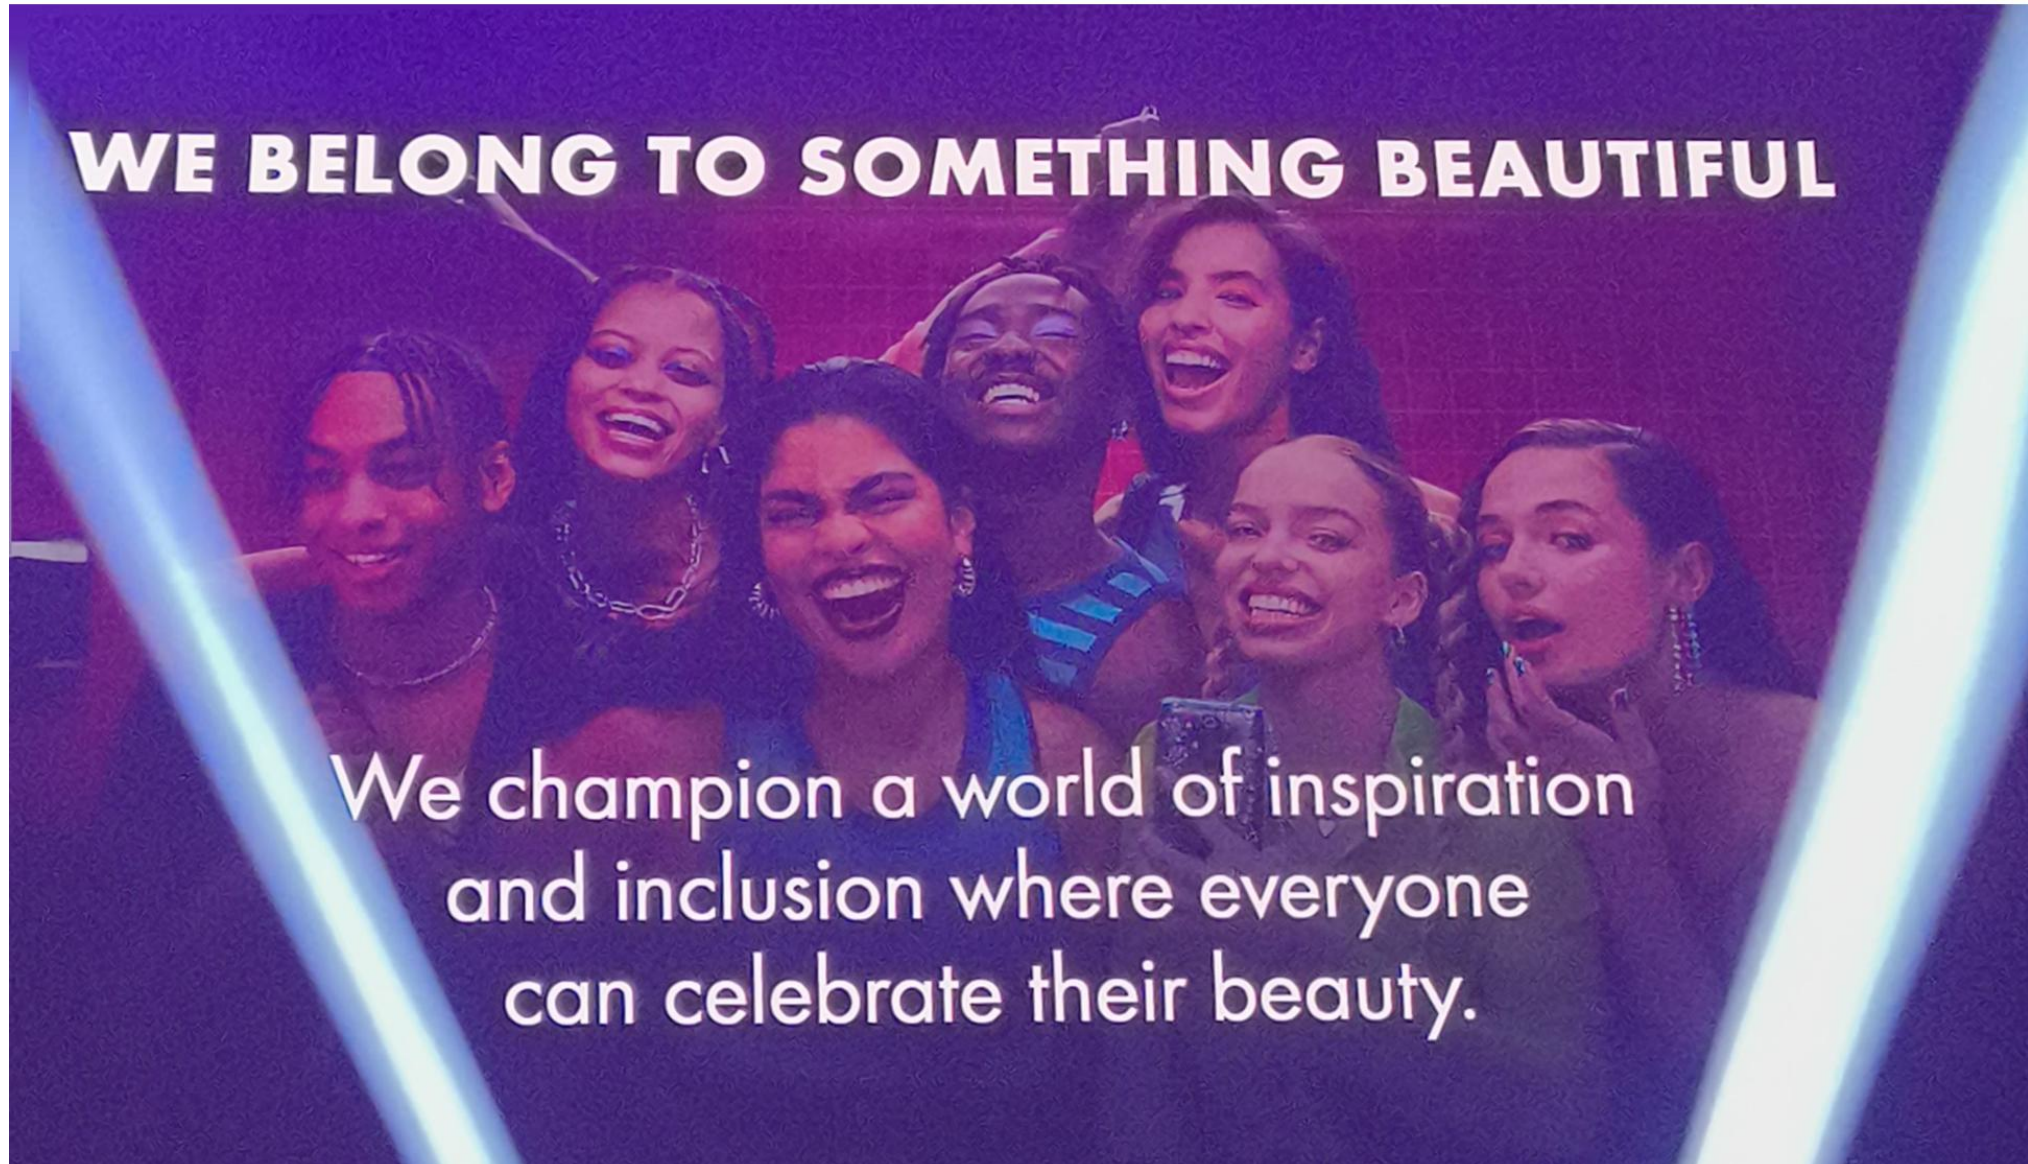

Community building

Three pillars

- **Purpose:** to align business and values, showing real commitment to causes that matter to the public.
- **Cultural relevance:** understanding and integrating into the local culture, respecting its particularities and expressions.
- **Long-term partnerships:** working with strategic allies who share the same vision and help increase the impact.
