Why not develop projects around the world

Some possible steps

Which of these 5 steps would be the most important, today, for your company to internationalize?

An aerial photograph of a modern, multi-story building with large glass windows and red horizontal accents. The building is illuminated from within, and its reflection is visible in the surrounding area. To the left of the building is a multi-lane highway with a few cars. The background shows a cityscape under a sunset sky with orange and yellow hues. The text "pecege" is written in a white, lowercase, sans-serif font, and "INTERNACIONAL" is written in a white, uppercase, sans-serif font below it.

pecege INTERNACIONAL

Case Pecege: Exporting Knowledge

The Mission

Spread high-quality knowledge and contribute to global economic, social, and cultural development.

Cooperation Agreements:

Establish ties with prestigious academic institutions abroad.

Scientific Visibility:

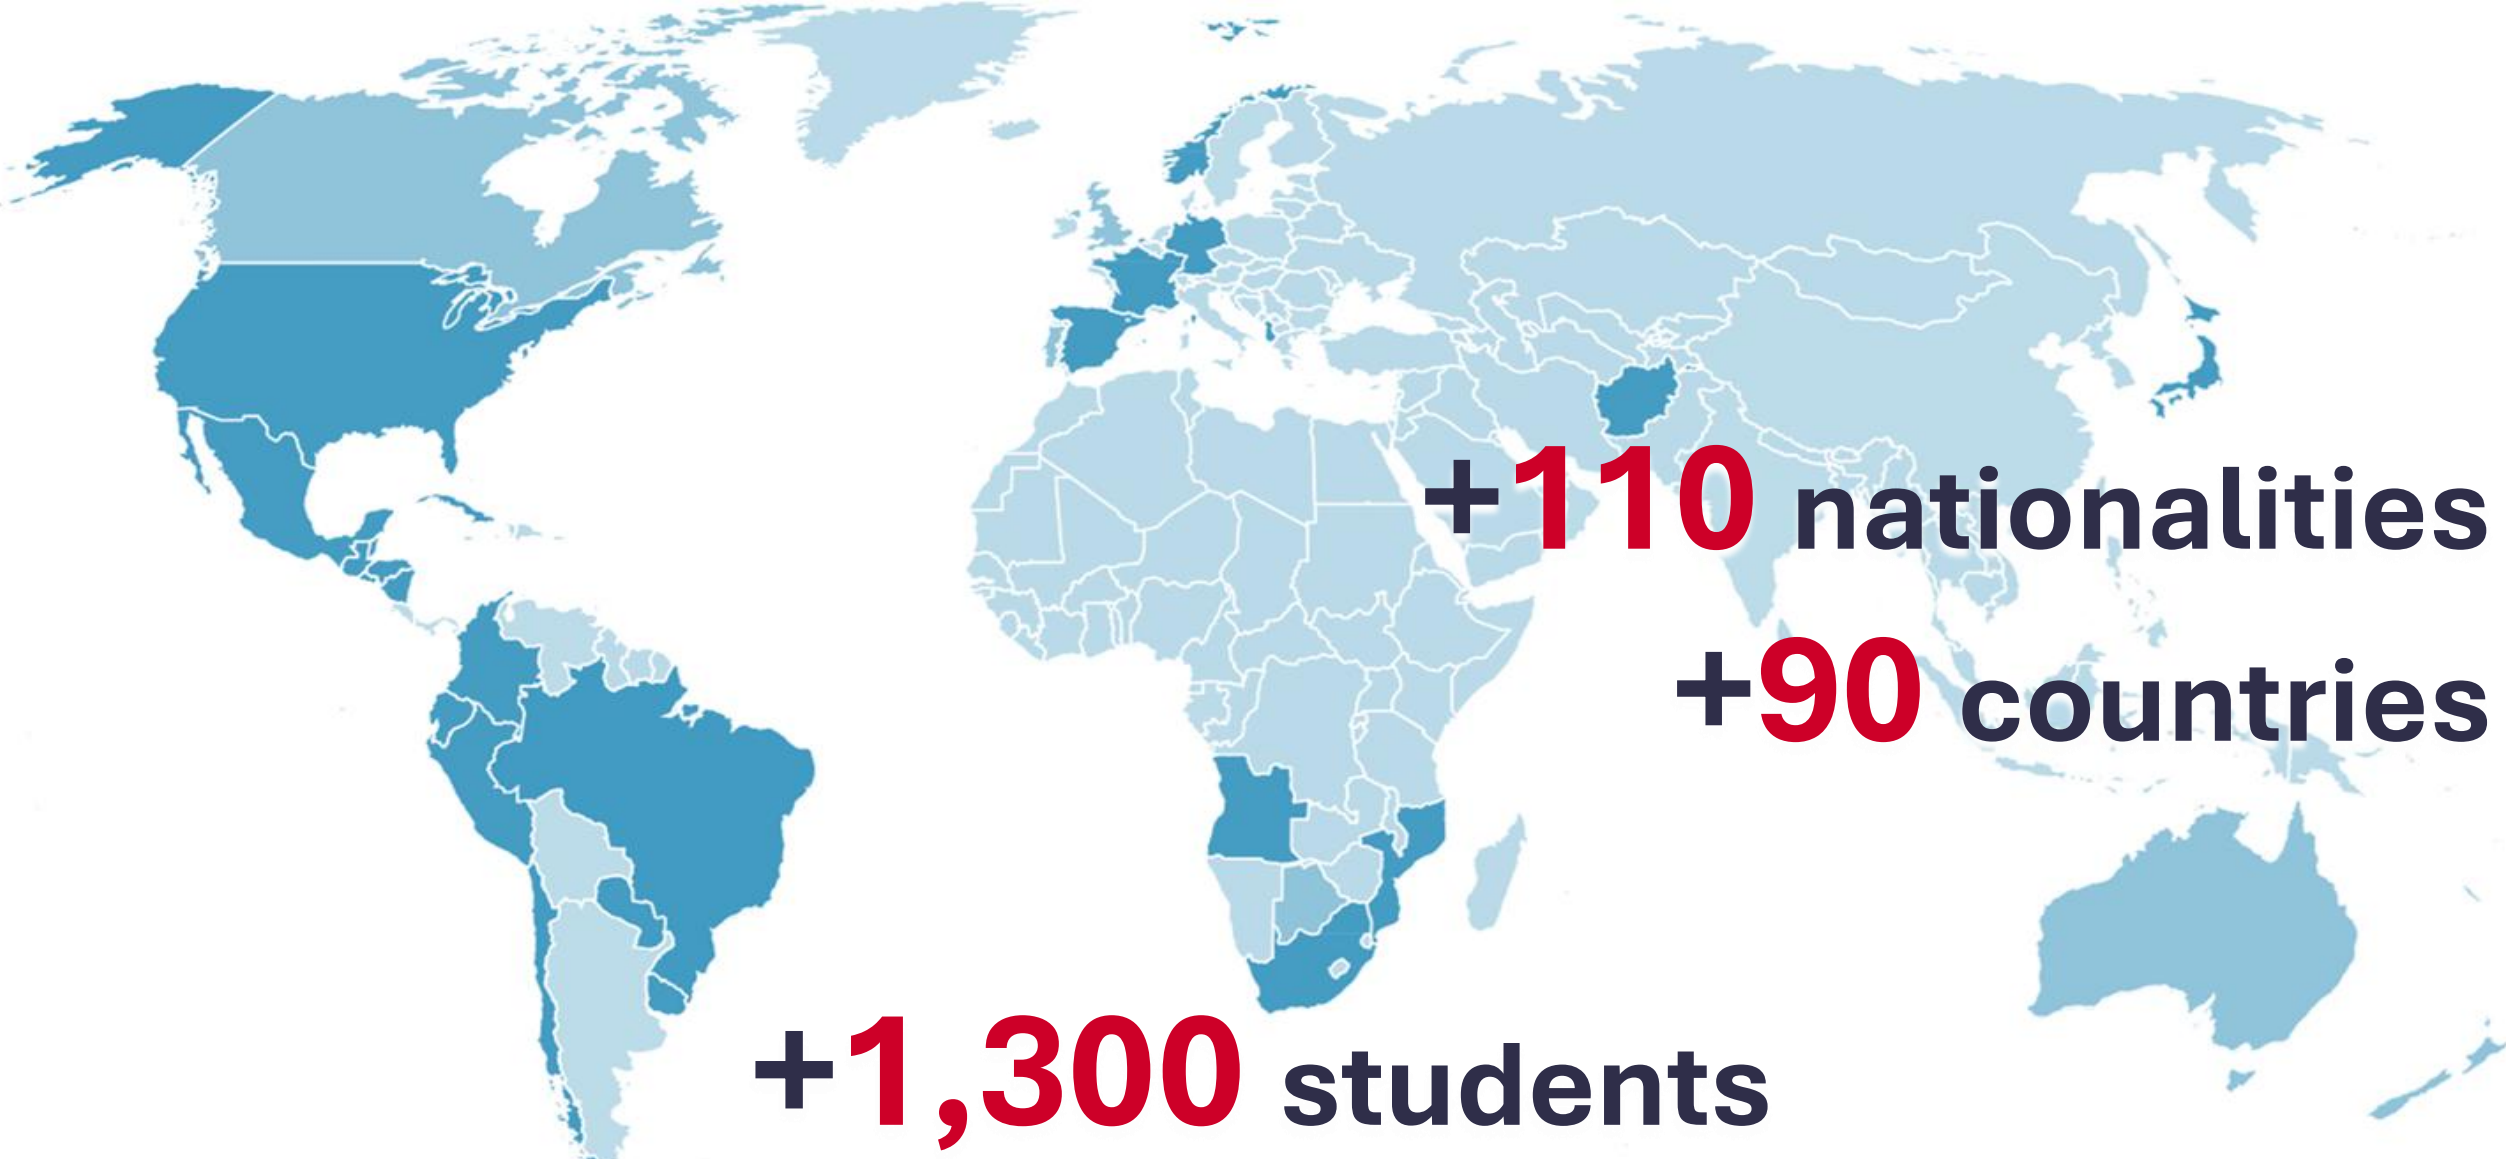

Consolidate agreements to amplify publications in international journals and periodical publishers.

Joint Research:

Develop collaborative innovation ecosystems.

Education as a Global Key

“

Education and innovative ideas help us to transform realities around the world.

Lasting commercial exchange begins with the exchange of knowledge.
Consolidating the economic aspect requires deep cultural and social development.

Why are we doing this

See the Macroeconomic context: Brazil x World

The Global Scenario (Source: Euromonitor)

Resilient Growth, but Restricted

Navigating a scenario of persistent cost pressures, geopolitical changes, and rapid technological adoption.

Brazil Scenario (Source: BCB - March 2026)

1,6%

- GDP growth projection for 2026, after 2.3% in 2025.
- Growth on a moderation trajectory. Domestic demand stabilized, requiring the search for new external revenue drivers.

THE NEW WAVE OF INTERNATIONALIZATION OF MSEs

SCALE: 15.108

MSEs served in 2025 (3x jump compared to 2024).

VALUE GENERATION: US\$ 64 Million

in businesses generated in just 13 editions of Exporta Mais Brasil.

LEADING SECTORS:

Food/Beverages, Fashion, and Home/Construction lead the new export wave.

Source: PNCE 2025 Implementation Report (MDIC/Sebrae).

Is it possible? → Yes!

Is someone trying? → Right at this moment!

Some tips I have seen

TIPS

Build Networking

Connections are worth more than contracts in relational markets.

Master Languages

Spanish, French, and English are tactical business tools.

Research the Culture

Thoroughly understand buying behaviors and local customs.

Be Data-Driven

Avoid guesswork. Use sources like Comex Stat and Euromonitor.

Political Neutrality

Total focus on the business; avoid polarizations or institutional friction.

A few more Cases

Starbucks

The danger of Copy-Paste

Challenge: Failure in Australia with standardized model.

Adaptation: In China, adapted menu, store architecture, and hours to local taste.

Result: Became absolute leader of the Chinese market.

Lego

Cultural Nuance

Challenge: Penetration in the Asian market with a European portfolio.

Adaptation: Creation of exclusive kits, local partnerships, and cultural concept stores.

Result: China became one of the largest markets outside Europe.

Nvidia

Technological Agility

Challenge: Dominate the global technology race (Forbes 2026).

Adaptation: AI readiness and focus on agile global infrastructure.

Result: Top of the global ranking of most innovative companies.

USA

- Objective communication: Straight to the point
- Deadlines: a deadline is a deadline!
- Performance is taken very seriously
- Language: Know how to communicate
- Hard worker (very few days off for holidays)
- Do not get involved in political matters
- Do not get involved in sensitive issues where the USA is in a tight spot

United Kingdom

- Very polite and respectful
- Punctual
- USA is advanced, but not left behind
- Be careful with the Exchange Rate
- They are more conservative regarding major risks
- If you gain their trust, business can go far
- Language: Know how to communicate and pay attention to the accent

China

- Always looking for business
- They are doing business all over the world
- They are adaptable and strategic
- Differentiated communication (use of Google, Whatsapp, etc)
- Language: it can be a very interesting differential
- Pay attention to political aspects
- Do not get involved in political discussions

Portugal

- Language made easy for Brazilians: but watch out for certain words
- Literals: do not be alarmed by how much
- Observe macroeconomic aspects
- An easy way to talk business
- Some apprehension regarding Brazil (CEO info)
- Advanced in terms of hubs and partnerships

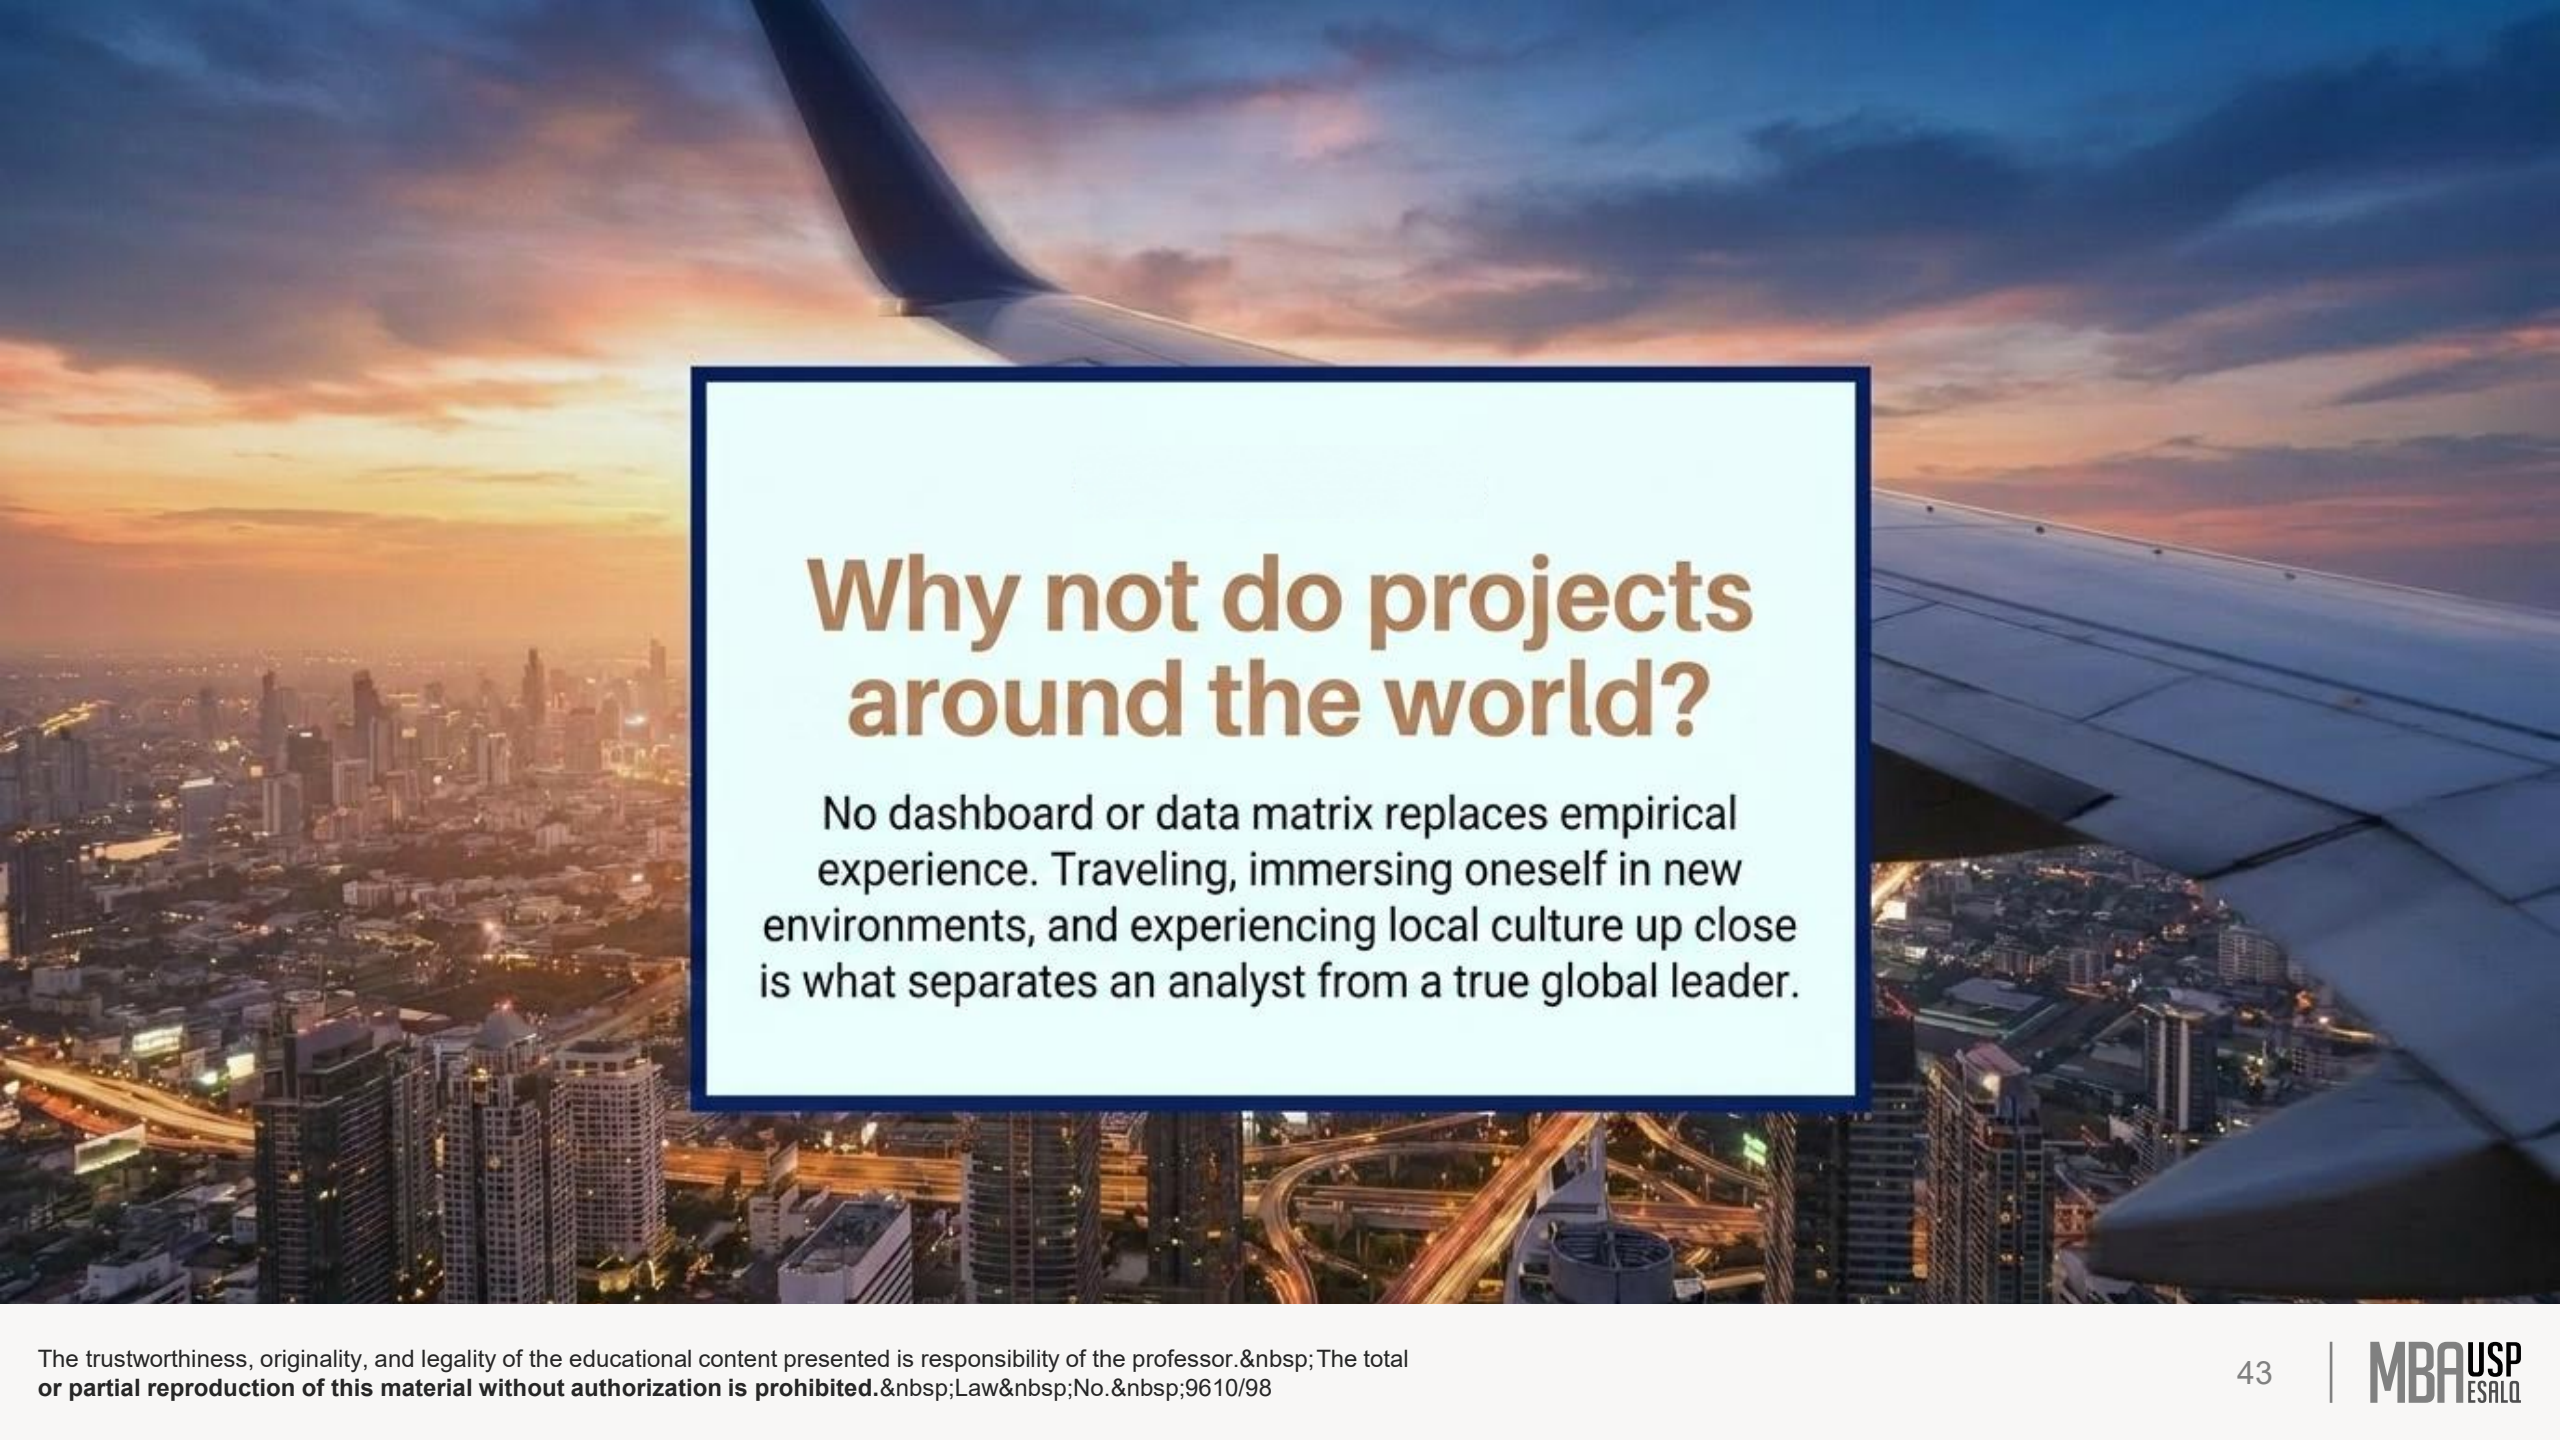

Spain

- May take longer for decisions
- More flexible regarding schedules
- Trust and Networking are very important
- High cost of living in some locations
- Good receptivity towards Brazilians
- Language: pay attention to accents

The flag of the Republic of Mali is shown waving against a blue sky with white clouds. It consists of three vertical stripes of green, yellow, and red. The flag is positioned on the left side of the slide, partially overlapping a dark blue silhouette of the map of Mali.

Republic of Mali

- Always looking for business partnerships
- Brazilians are well ahead in several areas
- Language: French
- Education projects are very welcome
- They seek ties with Brazil
- Easy communication access to high-ranking officials
- A large part of the country is desert
- Be careful with your planning, be adaptable

An aerial photograph of a city skyline at sunset or sunrise. The sky is filled with soft, colorful clouds in shades of orange, pink, and blue. In the foreground, the wing of a large airplane is visible, extending from the top left towards the center. Below the wing, the city's lights are beginning to glow, and the silhouettes of various buildings and structures are visible against the bright horizon.

Why not do projects around the world?

No dashboard or data matrix replaces empirical experience. Traveling, immersing oneself in new environments, and experiencing local culture up close is what separates an analyst from a true global leader.

THE GOLDEN TIP: GET YOUR HANDS DIRTY AND GET TO KNOW THE WORLD.

Elite professionals do not rely solely on management reports in PDF. They are physically on the streets, observing whether people use WhatsApp or WeChat, testing how local logistics work and feeling the social energy of the city. The real and brutal perception of a market is not hidden in an Excel spreadsheet; it is on the sidewalk.

What was your last international experience? (Not necessarily work-related)

Faculty

Prof. Andrew Callaghan

Andrew has 30 years of experience in strategic leadership and consulting on topics such as Industry 4.0, Big Data, and Cybersecurity. He works as a professor, SME executive director of an in advanced analytics, leads the Business School's Digital Transformation Program, and is a member of the University's Digital Strategy Committee.

Prof. Dr. Maria Alejandra Moreno-Pizani

Maria Alejandra works as a lecturer and consultant at Pecege in data-driven decision-making, executive education, and applied analytics. Her background includes international and multicultural projects with universities, research centers, public institutions, and international organizations, focusing on data science applied to executive decision-making.

Dr. Jorge Guedes

Jorge has solid experience in end-to-end digital transformation, having worked at companies such as PwC, Capgemini, and SAP. He also holds academic and strategic advisory roles, and is an international speaker on topics such as strategy, the future of work, digital policies, and leadership for transformation.

Dr. Stuart Moran

Stuart has over 20 years of experience combining academia and industry in topics such as digital strategy, enterprise architecture, and service design. With a background in Social Informatics and Human-Computer Interaction, he supports organizations in making strategic decisions based on evidence and practical impact.

Simran Verma Singh

SAPS
Simran is an consultant with international experience in transformation programs related to analytics, customer experience, and organizational change. She has worked at global companies such as SAP and Capgemini and currently develops applied teaching in SAP and Microsoft technologies, preparing students for careers in the digital environment.

Dr. Luis D. Torres

Luis works at the intersection of research, executive education, and consulting, focusing on corporate sustainability, sustainable work, and advanced risk analysis. He has international experience in over 15 countries and currently develops data intelligence projects with UN agencies and international institutions.

Prof. Stephen Lofthouse

Stephen has over 20 years of experience in technology and academia, focusing on SAP, governance, compliance, Big Data, Analytics, Cloud, and Cybersecurity. He works as a lecturer and applied learning specialist, with a background in large-scale projects and compliance programs across different sectors.

Frequently asked questions (FAQ)

How is the service?

All pre-trip assistance, such as questions, payment, general information, and registration, will be in Portuguese. Upon starting the trip, all program assistance and guidance will be conducted in the local language (English).

Are there any prerequisites?

Yes, they are: valid passport (with at least 6 months of validity) complete graduation; intermediate English (B1 level) — no certificate or test required; and a minimum of 18 participants for the class to open.

Can the course be taken online and in another language?

No, the course is exclusively in-person and taught in English.

Am I entitled to a certificate of completion?

Yes! The internationally accredited certificate will be jointly issued by the University of Nottingham and Pecege.

Immersion Week

NOTTINGHAM

November 23 - 27 · 2026

Is your career local... or global?
Local means reach.
Global means influence!

The world is no longer so big

A hand is shown holding a small, realistic-looking globe of the Earth. The globe is positioned in the center of the frame, with the continents of North and South America visible. The background is a soft, out-of-focus sunset or sunrise scene with warm orange and yellow light. The text 'And certainly not out of reach' is overlaid at the bottom in a large, bold, white font with a red outline.

And certainly not out of reach

Thank you!
