

MBA IN SOFTWARE ENGINEERING

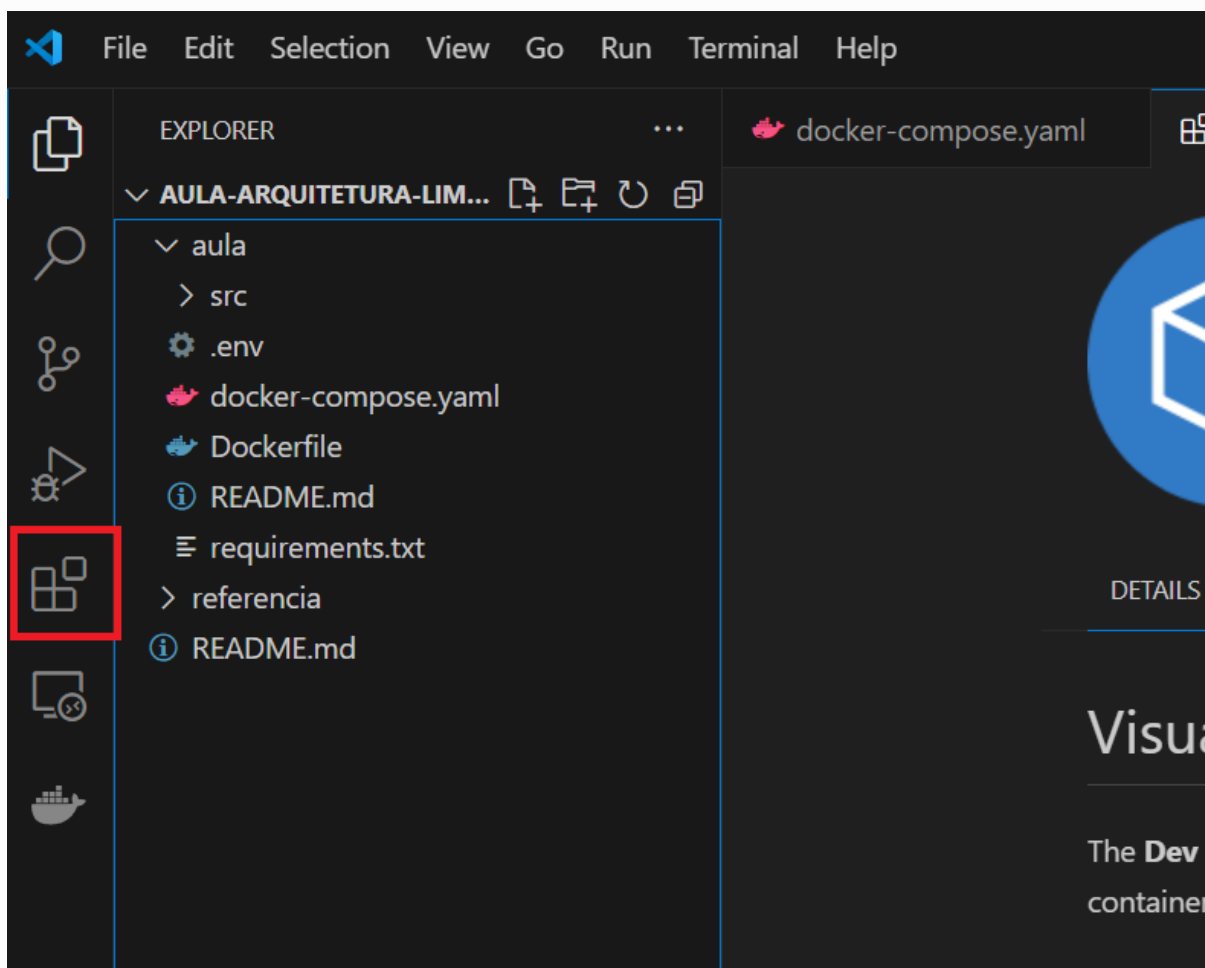

SUPPLEMENTARY MATERIAL

Clean Architecture I

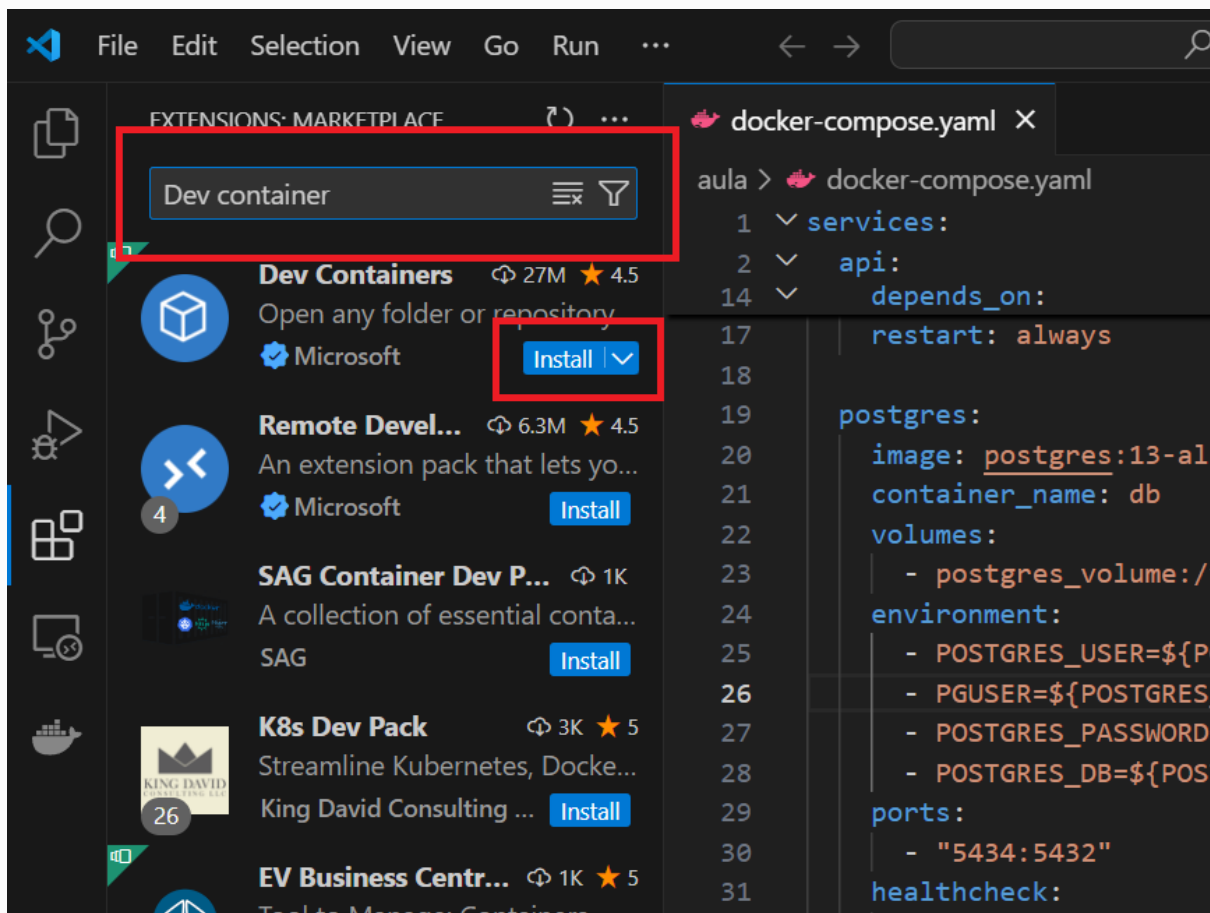

Professor Helder Prado Santos

Tutorial for installing the Dev Containers extension and accessing the Container via VS Code

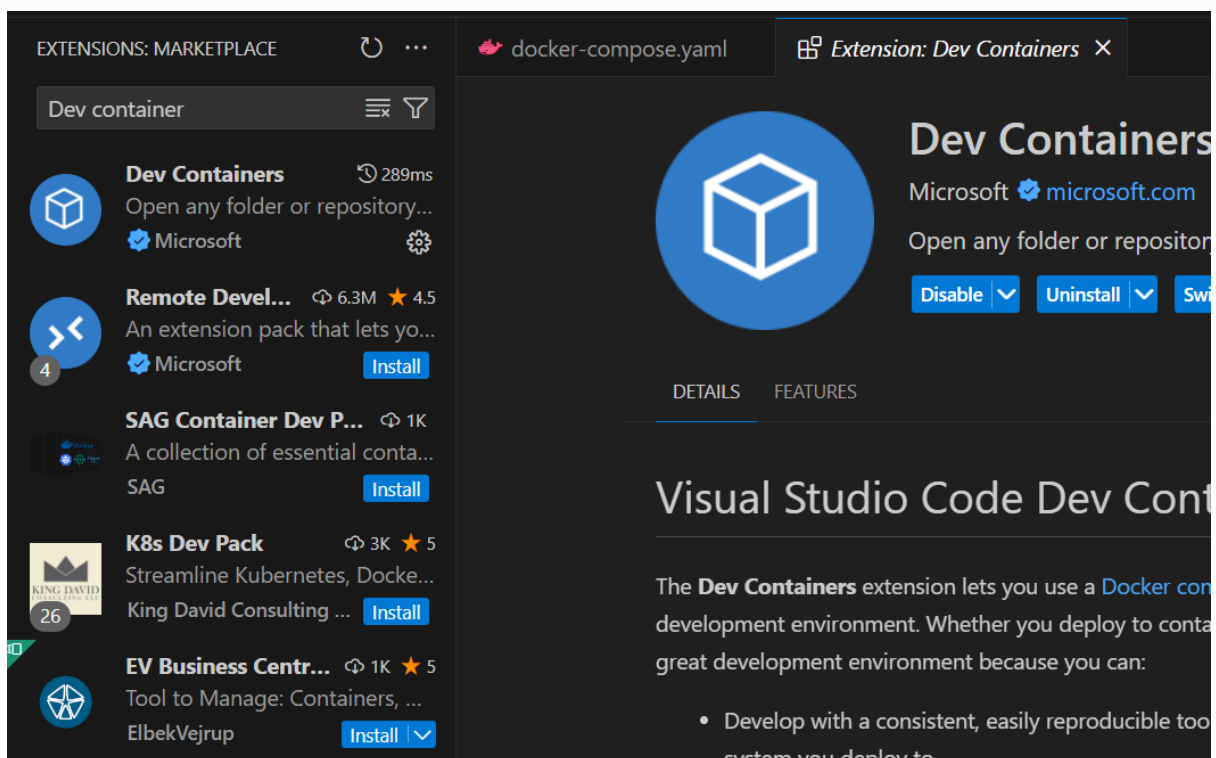

Inside VS Code, access the extensions tab by clicking on the extensions icon as shown in the image below.

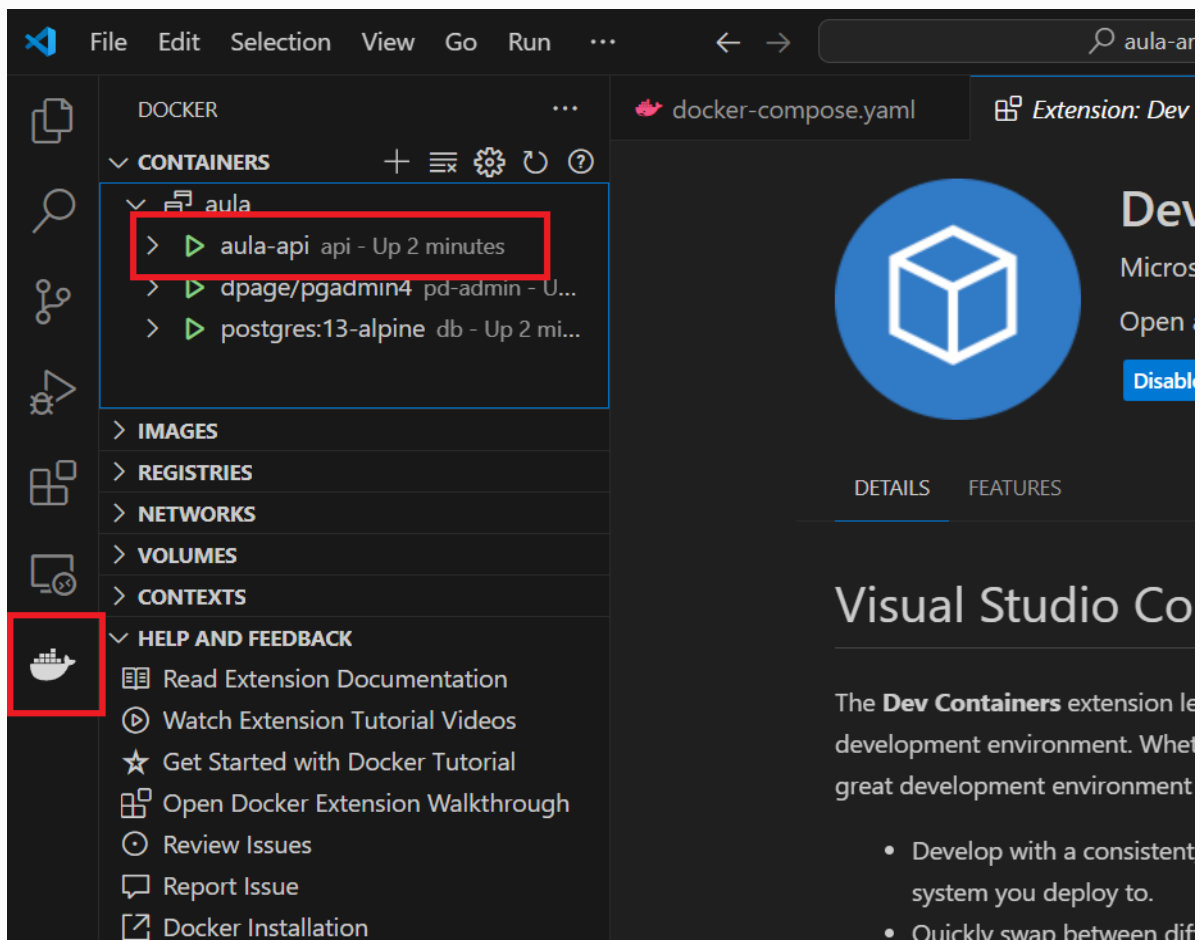

In the Extensions tab, type “Dev Containers” and click “Install” to install the extension in VS Code.

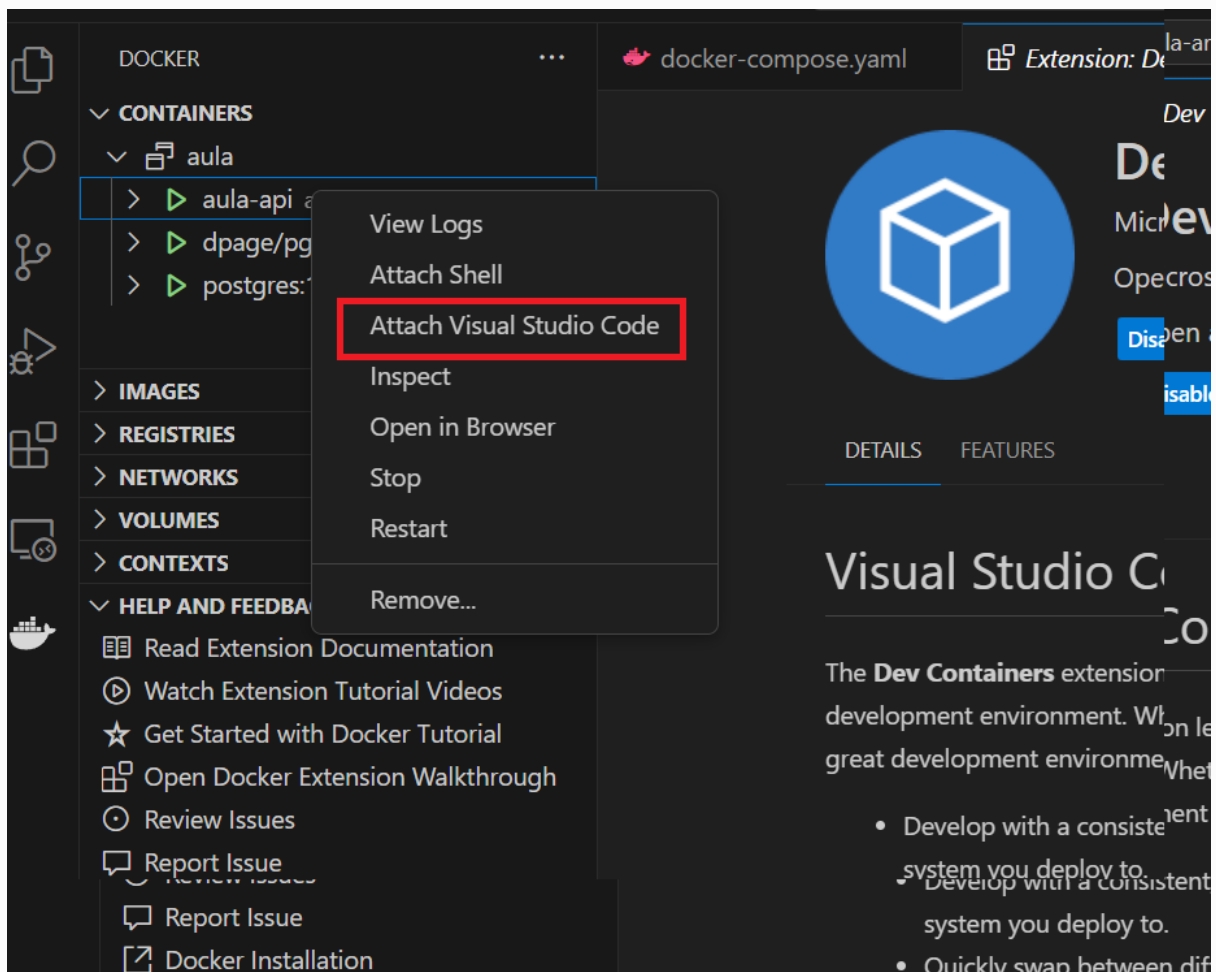

After installation, the install button will no longer appear.

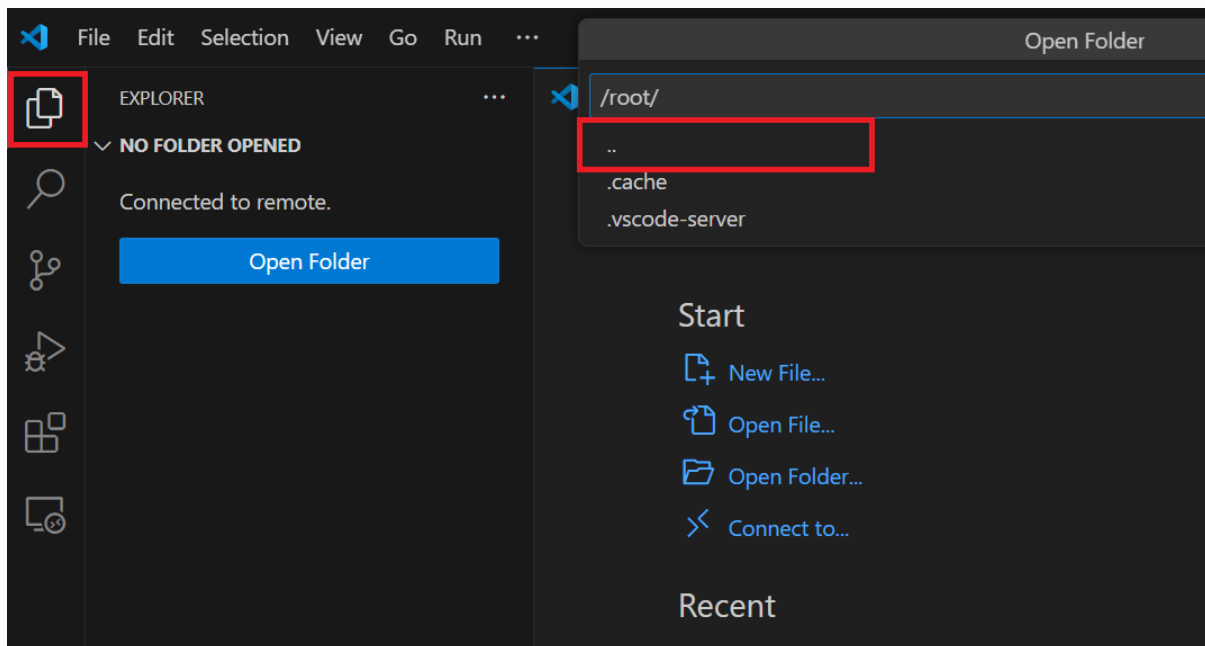

Access the Docker extension tab and right-click on the class container.

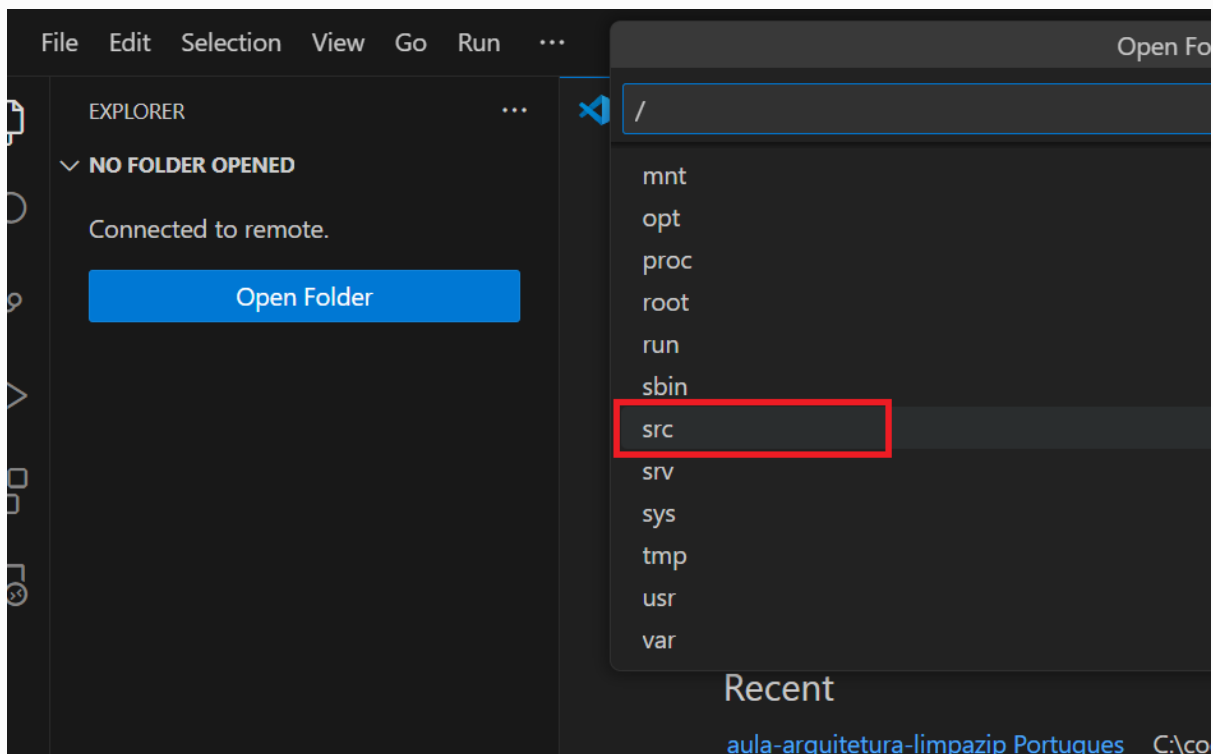

Select the option “Attach Visual Studio Code”

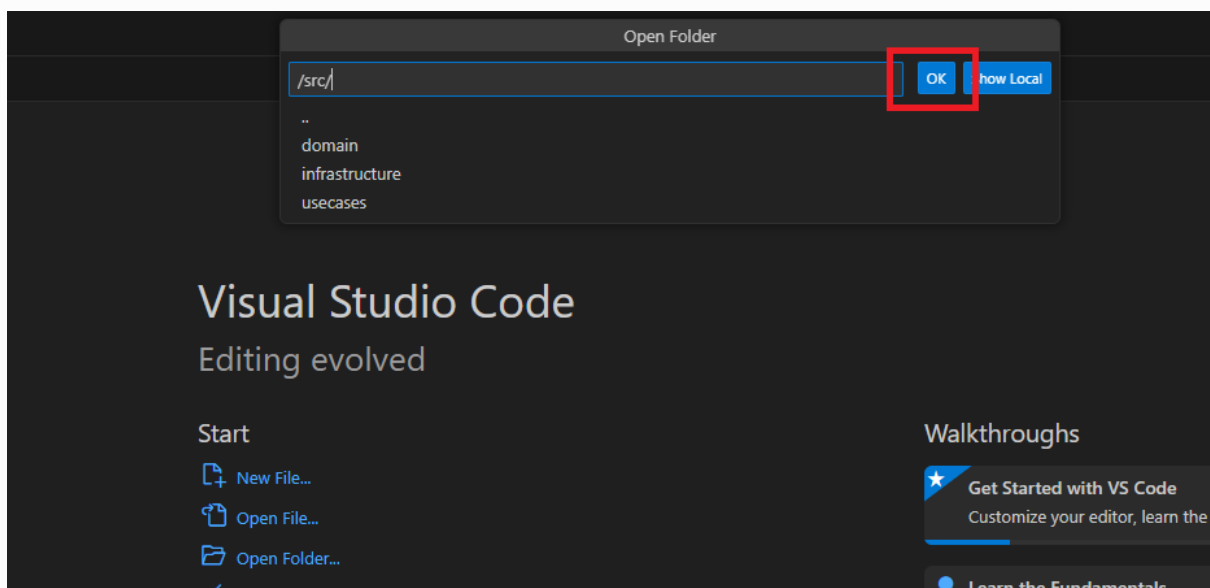

Inside the container, access the files and click on the path “..”.

Select the “src” folder inside the container.

Click on “OK”

Done, now you should already be inside the container and viewing the folders and files inside the container.
